

# Implications of climate change for children in developing countries.

## Outline

### 1. Introduction

### 2. Implications of climate change for children in developing countries.

2.1. Food insecurity caused by climate change will have severe impact on children of developing world.

2.2. Climate change is intensifying water crisis that will impact children growth and development.

2.3. Children are more vulnerable to extreme weather conditions such as floods and droughts.

2.4. Education and health facilities will be deteriorated due to climate change's disruption of economy.

2.5. It will cause diseases in children.

(Cholera, Malaria, Typhoid etc)

2.6. Displacement of people due to climate change will impact children's nourishment and growth.

2.7. Children in developing countries are more prone to threats due to limited capability of developing states to manage it.

### 3. Causes of Climate change.

Not asked

3.1) The generation of electricity using fossil fuels generate green house gases that is the main reason of climate change. (especially using coal and oil)

3.2) Deforestation is playing a vital role in speeding climate change.

3.3) Climate change started after industrial revolution and still, it is being expedited by industrialization campaigns of various states. (limit above  $1.5^{\circ}\text{C}$  rise target pre-industrial state)

3.4) Transportation also been fuel and emit hazardous gases in atmosphere

3.5) The construction of large multi-storey buildings and rapid growth of cities also play important

role in climate change.

3.6) Unequal distribution of wealth globally is making it worse for developing nations.

#### 4) Way forward

4.1) The re-nouable sources of energy must be promoted and used worldwide.

4.2) Electric vehicles should be made cheap and accessible to control the climate change.

4.3) Deforestation should be restricted and campaigns to plant trees must be initiated under the auspices of UN.

(Protection of Amazon forest, Billion Tree Tsumani)

4.4) Carbon emission trading must be initiated and followed effectively for developing countries.

4.5) Developed world should take the ownership of environment related initiatives under Paris conference and COP.

#### 5) Conclusion

DAY: \_\_\_\_\_

DATE: \_\_\_\_\_

Thesis statement: "The children in developing world are more vulnerable to the impacts of climate change because of their limited ability to counter it. Further, careful and efficient initiatives are required to cope with the situation."
