Outlines:

Introduction:

Attention : We need to educate our men and women equally because the society runs with both of them.

General statement:

Thesis : Women can play a very crucial role with a very high impacts on the national security and stability of a nation state. It could be happen through multiple ways like Politics, Sports, Science, Medicines, Businesses, and through other ways.

Main body:

(i) Stability through Politics:

↳ Equal representation

↳ Equal and broad opportunities with no Glass-ceiling

↳ Reservation of seats along with general representation in the Country's Parliament.

(ii) Through Education:

↳ Promotion of girl's education leads to national security and stability.

↳ Equal and same opportunities of to that of boys.

↳ Promoting them to higher ranks on the basis of merit, not nepotism or bribe.

(iii) Through Sports:

↳ An A-empowered women in Sport can give a clear message to the world.

- ↳ Advocate of peace and harmony
- ↳ Encourage women to participate more in the country's stability.

(iv) ~~Im~~ Justice and equalities:

- ↳ Different institutions of the country
- ↳ Different and eligible position.
- ↳ If no barriers in ways, women can strengthen a country more than a man.

(v) Business development:

- ↳ Barrier free business
- ↳ From Entrepreneurship to most successful.

~~Conclusion~~

(vi) Religious Matters and Services:

- ↳ Religion, women and state.
- ↳ Role of Islam in the empowerment of women and its role over the world.
- ↳ Struggle for the country's prosperity in the premises of Islam.

Conclusion:

A saying is "we should educate our men and women equally because the housework and the society is with them." It shows that how important is a women role in the happiness and prosperity of a nation. Women Population is half of the world, and there is no possibility deny them and deprived them from their services. They can perform their services in every sector and institution of the state. The half population can make the world even more beautiful and strengthen the nation. Their services are for enviable in the world but specially in Pakistan, where their being a conservative and patriarchal society, they are not encouraged and neither they get proper supports to showcase their talent. But still they working and they worked hard to perform and do their part in the stability and national security of the state in many ways like in Politics, sports, Education, and serving in different institutions such as military, judiciary and human rights. Through these aspects of services, women, who are almost fifty-one percent of the Country's population, done alot for the global security, national security and national stability besides the house-hold jobs as well.

The services for the country can not be denied and that is too in the field of politics. Their job in this field is like moon among the shining stars. The

Stars shows indicate the number of male politicians, their sparkle shows their services for the country's stability. Among the stars stars, it is the sun moon, whose brights even more. Moon shows the women in politics who are not in majority but still they has the capability to shine even more than the stars. It has possess the ability to shows path to the lost people in the dark and even guide them in more efficient way. That is not only in Pakistan's but the situation of global politics as well. A woman devote her self holy solely to the services and take it incumbents on her, that is why Brazil is the country with the highest number of women workers in their institutions followed by Mexico, whose main offices are being controlled by the lady officers. The institutions like judiciary, senate and not the Parliament with the selection of Claudia as first President of Mexico in it's history are under rule of the women. Another one is a European state, considered most happiest country of the world Finland, whose former Prime minister was a young female name Sanna Marin. In her tenure, the country was such stable that the education was free for every mass and ranked ~~or~~ ~~to~~ second in the best education system. Such was the situation for national security, the country was an effective member of North Atlantic treaty organisations.

Same was the situation in Pakistan in the reign of first woman Prime minister and the daughter of former Prime minister Zulfikar Ali Bhutto. The Prime minister Benazir was not only the first woman to drive the country of Pakistan but was also first in the muslim world to head and run the whole system of the country. She was the one who handover the world cup trophy to the winning Captain in her second tenure of her ruling which ~~was~~ ^{was} the biggest achievement for Pakistan in the national security strengthening. This can be improved even more by giving more responsibilities to the women and reserving more seats for them in the Parliament of country.

Along the services in Politics, Pakistani women also ~~the~~ illuminate the country and strengthen the security of Pakistan. A girl in her teenage from the backward mountains of Khyber Pakhtunkhwa, to the stages of United state of America is a big service and job. The girl was a brave Pashtun named Malala, who was shoot down by Militant in the area of Swat, because of the struggle of for girls education. Malala was not only a symbol of Pashtun and Pakistani nation, but a ~~role~~ role model for all those girls who perform their service or who aims to do something great for the country. The young girl ~~was~~ ~~was~~ is a laureate of Nobel prize for peace, that showed the world that not only ~~the~~ government, but even every

Child is a peace loving who can sacrifice their lives for the country's stability and prosperity - This is not only, but a lot of girls are there in the history who performed a lot for the country and its fruit was very sweet - The seed of which was sowed among other nation members and specially among women - These plants can be sapled through education and when it grow it will be distributed among different areas of the country to do what is good for the country - By investing equal on boys and girls, it will create a sense of equality, friendship and loyalty among the peoples. It will promote a corruption free, meritorious and clean society that was dreamed by many leaders and the biggest need of the hour for Pakistan's national security and stability.

Albeit, the women performed and still doing in the politics, education. But the major thing that most commonly increasing in our youth day by day, and our history is full of such examples through which the image of Pakistan is become very soft is nothing but the Sports - Women of Pakistan did a lot in the sports that presented them the advocate of peace and harmony to the globe. It strengthens the economy and security by showing that supported and motivated women can do everything for the world and country stability in this way or that way. The world that is thinking of Pakistan a

terrorist and women deprived country, changed thinking about Pakistan when a local girl Naila Kiyani mountaineer climbed eleven peaks of the world including K-2. The record was previously owned by another girl Samina Baig. That gave a message to the world to change the stance about the national security of Pakistan which leads to the stability of national security.

national stability - When the security issues are not there, the country progress for the stability is uncontrollable and that is the reason the European Union changed the business category to positive for Pakistan. Pakistani girls and women are on the good positions in the sports sectors of Pakistan. The examples are Zainab Abbas, a sport presenter present across the world, Aaliya Riaz, first female head of Pakistan Hockey Federation, not only factors of national security and stability but can be a link of connections among other country countries to give a message to go cooperate with each other in different sectors of life that can stabilize the economy of Pakistan upto some extent.

The foremost factor that strengthen the Pakistan security and stabilize even more is the right for person for the right job. It means to assign the position on the merit regardless of the look, creed or something else. This what no promoting across the world. It make the women and even everyone to staunch the authorities and devote the services for the stability. Examples the promotion

of Christian doctor Dr. Helen Meriy to the rank of Brigadier in Pakistan army or the appointment of Aaliya Neelum as the first Chief Justice of Lahore High Court ~~it~~ indicates that how these ladies would performed for the sake of Country to reach such high ~~rank~~ ranks. With this they will not work ~~with~~ whole heartedly for the Country's stability but would be an inspiration and courage for the girls to come forward and do something great for the Country. In the same way it is some sort of the break-down of glass ceiling for the women. The world who considered Pakistan a worst place for minorities can take a lesson that how this Country is gaining the trust of the minorities. The Country is providing equal rights to them, freedom of religions and even same opportunities of everything even in most secret matters as well. ~~to~~ This is what they play specially their women in the stability of the Country. ~~Also, the~~ ^{the next} religious factor is ~~also~~ a ~~crucial~~ crucial one in the ~~to~~ Country matter specially in the security ~~to~~ and stability. Along with the ~~o~~ other factors, ~~the~~ Islam also give a role to the women in the Country matter. where they can contribute in the stability, selection of ruler, performing different ~~o~~ jobs i.e. businesses. In the old times, the women used to contribute in the Country matters. They performed certain business and also took part in the wars

against Pagans in - the Peninsula of Arab-
The wars were not for their own interests
but for the sake of Muslims, Islam and
State's stability. In those they even embraced
to death just to make the Country strong-
The women also took part in the selection
of Caliph after the Holy prophet - This ^{was} ~~to~~
why just to know their opinion about the
person (caliph) going to be selected as
head, whether he is good for good for
the muslims population, suitable for the
government and possess the capability to
strengthen the muslim state even more and
provide victories to Islam - According to an
Author, the Hazrat Ali (R.w) was assigned
to the task to inquire the women opinion
regarding the selection of Hazrat Umar
and Usman - In this way they women
took part in the stability of the Islamic
Country by selecting a suitable person for
the job.

A Society has two tiers: The man
and woman - If there is only a single,
the society would be unable to run one
that - Similarly the world has almost
the same population of men and women,
if a same small society can't go on one,
who the world with a population of billions
be would be prosperous with out the services
of women - The women's services is clear to
everyone but the services of the other tier is
obscure in the stability and security globally
and Country-wise. Like in Pakistan. In
Pakistan, the Society is male dominating

and there are some sort of restriction and barricades in the ways of women to perform whatever they want to do for Pakistan. Here their male snatches the credit of women when they do something great except a few who used to support their women whatever the situation do they have - they encouraged them to break the obstacles and chains and for the success and prosperity of family, nation and for the national security along with the stability in different fields - Such women do not think about the failure and perform the services in multiple field like Politics, Education, Sports or by serving in different institutions of the state such as Military, Judiciary, health care or any other sector and contribute in the national security and stability in either way. The message of their services and sacrifices for the progress of the country is not hidden from anyone and they will contribute even more in the national stability and security of Pakistan in the future.
