Precis

A cyclical outlook of life; Future demands resilient warriors rather than parasites munching upon the existing achievements; Pursuit to enduring success

In an interview Sheikh Rashid shed light on the cyclical pattern of life that underscores a complex interplay between non-guaranteed prosperity and hard adversities.

He views the view that during tough times human survival & progressive instincts emerges onto the surface, preparing him to counter those times with hard work, perseverance and self-reliance; creating strong men - the "Warriors". However, as the society transits from adversities to prosperity - enjoying upon those comfort for a little too long can also transform the strong warriors to useless weak "parasites" that eat on the efforts of others entirely, lacking basic survival skills needed to handle the hard time. He further added that in order to sustain and evolve the periods of prosperity and long term success, we have to invest not only in the infrastructure

and technology but also have to work on the human nature, by putting vigorous efforts and nurturing the strong and capable. Only by then we can handle the unpredictable future with strength and resilience.
