Mock exam

## Question #2

Gaza human crises has become a classic example of war crime by Israel but the champion of human right is silent. Find out the reason and explain how it would affect US relation with the muslim world.

### Answer:

Gaza war started from October 2023. It is still happening. Loss of human and humanity in Gaza and big power respectively deteriorate. More than one lac people including 18,000 children, women, men, died. There is no getting medical treatment. They even

not get a food. They are helpless  
No one can help them because  
israel army roaming around  
gaza, west bank, Rafah. There is  
a huge loss of human.  
It looks like the war against  
to kill the humanity. No one  
country in the world take  
a strict action regarding in this  
human crises. Even India is  
providing 900 drones for  
air strike. Big power is silent  
in this war.

**Reason behind the  
Champions of humanity  
right is silent:**

**Champion of human right:**  
In the world, the countries like  
U.S, U.K, Germany, France, India,  
they are considered themselves  
the world runner. Without them  
world law, system can not  
run properly. They considered the

masters of human right. But  
actually they all are remain  
silent on human crises in  
gaza.

**Occupied the area of  
Palestine due to U.S.**

Israel is the colony of America.  
When they are living in Palestine,  
they are small in number. but  
gradually, America call all the Jews  
to live in this area. With the passage  
of time, they were huge in number  
and control the whole Palestine.  
This is possible due to U.S. That's  
the main reason to not go to  
the against Israel.

**Control the trade that  
occur in the Arabian sea  
& Strait Hormuz.**

U.S. want to control the area  
around Palestine and take  
a control the trade that occur  
in the Arabian sea & Strait of  
Hormuz. U.S never want to lose  
their grip. so they colonize Israel

Now, whatever israel want to do, they do independently. U.S can not do anything. They remain silent.

**Advanced technology that israel have due to U.S.**

israel have latest drowns, Bombs, to kill the person in the world. They have latest J.F-17. That is revolutionary weapon. This latest technology, israel have after that U.S. U.S sale their weapons in israel. They weapon industry may victimize so they remain silent on human right.

**U.K remain silent on gaza war human rights**

In 1700's, the human right bill passed in U.K to give equal right. Magna carta declaration Passed. But U.K also remain silent on the war on gaza. They are also allies of U.S. That's the reason

in UN session. The most of trade occur through middle east, south-china sea.

They can stop the trade.

U.S dependent on Iran, Saudi-Arabia, Afghanistan for oil reserves. they can cease the supply of oil. It can affect the economy of U.S.

### Conclusion:

Gaza war in which human rights are violating, it is needed to be cease fire by israel. The big power is silent, but they must break their silence for the humanity rights and follow the UN charter. Otherwise, it will be badly affect the relation of U.S with the muslim countries.

### Question #3

The future world would be techno-Polar. Whosoever dominate in technology would lead the world.

Comment.

#### Answer

Future of the nation depends upon the daily task. Most of the countries increased their strength in technology.

They want to be more revolutioned in the world. They want to cause the revolution in the era of science & technology. There are big power like, U.S, China, India, U.K, USSR et-c.

#### Future world would be techno-Polar.

Future world would be techno polar because the modern countries enhance their power in technology. China and U.S, race has been

starting to grow more than the other. China invent the Apple iPhone. America is ~~Procter~~ big user of apple. Chinese products are cheap than American products. They export 60% products to the U.S. U.S also want to dominate the technology and lead the world. but due to China, Russia, it is not more easy to dominate the world.

**China want to dominate by the Taiwan:**

Taiwan is the part of China. Taiwan is the 60% producer of semiconductor. Semiconductor is brain of every machine. They sell these semiconductor chips in international market and get more benefit from it.

**U.S want to dominate in world.**

U.S want to dominate the world by the help of technology.

U.S want to become more

revolutionized due to technology.  
The countries dominate  
the world:-

Those countries will dominate  
the world, those are getting  
more technology. They will  
use the revolutionary ideas  
to invent the products that  
helpful to the mankind.  
They control the world order  
and run the world according  
to themselves.

### Conclusion:

Future will be based on technology.  
Technology will adopt the all  
the shapes of life. The countries  
who's more use of technology  
and revolutionary, dominate the  
society and run the  
world order.

## Question #6

Load shedding and ballooning electricity prices badly hit the economy of Pak. Critically evaluate the statement and give possible Recommendation.

Answer:

Introduction:

Pakistan is the rich source country. Nature provide the everything to the Pakistan. But due to instability of the resources and fail to manage the resources cause the destruction in the country. Loadshedding and the electricity bills prices reached at hike that badly effect the economy. Pakistan have four season. Moon-soon is the rainy season. at that time, there is full potential to manage the fresh water and used it to alleviate the need of electricity. Most of the electricity can be made from it but due to carelessness, these

results face the Pakistani nation. The problems of loadshedding and electricity bills prices can be low by acting upon the rules of law and to manage the natural resources. We can get prosperity without considering hindrance & obstacles.

## Loadshedding disturb the daily life activities:

Loadshedding is the shortfall of electricity. It occurs when state can not meet the need of public. Loadshedding disturb the all the activities of daily life. It destroy the working of industries, institutions. but it can not be stopped.

In rural areas, loadshedding occurs 20-22 hr. In urban areas, loadshedding 16-18 hr must be off.

But the electricity bills do not decrease

they reached on time like that public use electricity 24hr per day.

**Electricity bills. Price increasing day by day.**

In last year, the electricity bill come within range. For domestic purpose, one unit of electricity is 50-Rupees. but now the price of electricity increase. Now the one unit of electricity is 69-Rupees. How the public can pay the electricity bills. Govt apply the taxes that hit the economy badly. A lay man is anxious about the loadshedding and the electricity bills price. They meet their needs or pay the price of bills.

**Recommendation:**

**Use renewable energy resources.**

Now a days, world is moving towards the renewable resources.

they produce electricity through sunlight, hydal power, tidal power, biofuels. it will cheap the prices of electricity.

### Apply tax on the elite class:

Govt should apply tax on ruler class of the society. This is not equality to pay the equal who take the <sup>different</sup> pay at different scale. A person is 15 scale, or 22 scale give the same tax.

### Deteriorate their expenses:

Govt should take action to diminish their expenses. they ministers, officers use 300 unit free electricity, 100 lit free petrol they must decrease their expenses.

### Advanced line system

most of the electricity loses through the old line system. more than 20% electricity is wasted through this. modern line system is introduced, so, line losses diminish the

the loss of electricity.

## Making of dams to store the water

Dams are necessary for the storage of rain water, oceanic water. Water can be stored and by using this, electricity can be generated.

## Conclusion:

Loadshedding and electricity bill prices disturb the lives of people. They can not afford the heavy. They have no price to fulfil their basic needs rather to pay the bills is the big problem. it can be cured by taking check & balance or introducing renewable energy resources, minimize their expences, to introduce the modern line system in electricity. so, it is better to follow the measure and can control the heavy bills.
