  - 8) A respected career need.
  - 9) Cultural and Social responsibilities.
  - 10) Economic chains .
  - 11) Political chains
  - 12) Technological chain
- Conclusion.

"GIVE a man a fish, and he will eat for a day. Teach a man how to fish, and you feed him for a life time."

In our fast moving, fast changing world, ancient wisdom may no longer apply. And chances are it is true. There is this proverb with unclear origins yet sounding ancient and wise:

"give a man a fish and you feed him for a day : teach ~~him~~ a man to fish and you feed him for a lifetime."

I can imagine the old bearded man in white robe sitting under a very old tree on some mountain top, the wise hermit you come see after a long, difficult and dangerous climbing. You seek guidance and -this is

the kind of advice he gives you there were times when time was slow and a man had to take care of himself about many aspects of his daily life. Nowadays when someone asks for a fish, they want a fish. And they want it now. They don't care about the details how to catch the fish, and they want it is just about the immediate satisfaction of the need of fish. Why care about the fishing technique? In a world of interconnected networks it is enough to know someone who masters the fishing technique. Nobody cares climbing the mountain for advice either, the wise old man is a digital native of less than 18 years, and his cave is named Facebook, twitter, snapchat ... you name it. Basically a man should be taught a skill not giving him help for a shorter period of time.

On individual level, everyone is in need of livelihood that should be on small scale ~~or~~ i.e. for lower class or lower middle class or large scale i.e. upper class, so giving them help cannot minimize their problems rather than the number of public industries should be increased to compensate the hurdle of unemployment.

On political platform, bills should be passed in national assembly for the budget to spend on public sectors to accommodate new peoples. Also in educational sector, the way of teaching should be modified from traditional cramming one to practice one so that students can be able to make themselves skillfull for themselves and the society.

In Pakistan, for the bussiness economy; whenever, high technicians are required, they are brought from the developed countries because we have just read those processes in book not on practice bases.

Similarly a high portion of GDP is spend on the heavy machinery for the industries and vehicles. So if we make skillfull youth, they will give us a prosper country.

Our relegion Islam, always teach to earn by ourselves because it gives the responsibility of wife and children along with parents and siblings, the idea that every individual is a responsible figure of the society, so they should not seek help from one another rather than they should learn skills to earn by themselves.

On domestic level, illiterate women in Pakistan know how to sew the clothes etc so if sewing machines are provided to them on installment, they can give a better result of self earning which would be good than giving money to them by benazir income support etc.

In this digital world, if ~~we~~ <sup>people</sup> know how to use digital appliances for earning then they will succeed for a better livelihood. Similarly, if Pakistan needs loan from IMF, then that loan must be used in a skillfull way otherwise it will give more burden to the nation.

~~Sub continent~~ is

In Pakistan we have cultural norms and our society make us responsible to earn by our selves. In Islam, the Holy Prophet (S.A.W) said that man is good if he spends on his wife and children.

~~In short~~, our large number of ~~people~~

China, a rising country of the world is uplifting due to its skillfull population. The size of population which is hazardous for us, is beneficial for China because they are making there youth useful. Similarly, other developed

countries, like USA, UK, e.t.c.

To conclude that only giving something to a needy person is not enough unless you help them in getting better job because that will be for a lifetime. Henceforth, our leaders can also do that with us by giving us the opportunities to overcome the problem of bread earning and other basic necessities of life.
