The Essay

"Media is the most powerful entity on earth.

They have the power to make the innocent guilty and to make guilty innocent, and that's the power. Because they control the minds of masses?"

This quote by Malcolm X underscores the profound influence media exerts on society. Over the decades the media landscape has dramatically evolved with television, social media, and online platforms being integral parts of daily life. While media holds the potential to inform and educate, it has also become a channel for spreading immorality. The widespread presence of modern media has significantly contributed to the spread of immorality by normalizing violence, sexual content and unethical behaviour.

Understanding how media propagates immorality and implementing measures to mitigate these effects is essential for fostering a healthier society.
