

PART-II

Strong future of nation

Resilience in youth: a secret of prosper nation

Q. NO. 02

Sheikh Rashid revealed that the development of society and his country are intertwined and are cyclic in nature. Like a strong man with certain qualities can bring more development in a country than a weak one. Therefore, hard times always comes with ease and the country has not always remained prosper. During the hard time a strong man can overcome all the difficulties through resilience. Therefore, there is a dire need to raise such youth which possess certain qualities to excel the difficult time.

He advocates for raising "warriors"—resilient, resourceful, and responsible individuals—rather than "parasites" who depend on others.

According to Sheikh these goods can be brought about in the young generation through education. Through education one can not only achieve the required qualities but also the prosperity. So, the authorities of Doha should invest more in education rather than in infrastructure along with infrastructure and technology.

Sheikh Rashid's insights remind individuals that maintaining prosperity requires continuous effort and the development of strong individuals, preparing society to face future challenges with strength and resilience. All lies in developing the youth rather than developing infrastructure.
