

Topic: Change does not always mean progress

### Outline:

Introduction: Change is inevitable, but it does not mean that it always brings progress in the world.

How change does not bring progress:

- a) Emergence of globalization disturbs the social order of the world
- b) Advancement of technology destroyed peace and prosperity of nation (Israel and Palestine conflict)
- c) The new capitalist ideology increased inequalities and class conflicts (Hegemonic power of USA and the oppressed nations)
- d) Emergence of AI (Artificial intelligence) destroyed the academic integrity of researchers.

for health

e) Spread of misinformation and  
propaganda on social media  
increase terrorism and  
extremism

Conclusion:

Change has destroyed the social order of the world. Instead of bringing progress among nations it has created a chaos among them. Globalization has badly hit the under developed countries. Progress of technology destroyed the peace and prosperity among nations. Inequality and class conflicts has increased due to capitalist mind sets. Education sector of the nations badly effected by the advancement of AI. The world is facing severe climate changes due to industrialization. National security of the countries is badly effected due to nuclear arms race. Owing to rapid use of chemicals the number of hazardous diseases increased across the world. People to people to contact has badly been effected

DATE: \_\_\_\_\_

DAY: \_\_\_\_\_

due to excess use of online platforms. Most of the people lose their life due vehicle accidents. Mental health and eyesight of the people have badly been effected due to excess use of social media. The cases of rapes and sexual violence are rapidly increasing due to easy access to unethical videos and films. There are countries which are facing the challenge of terrorism and extremism due to spread of misinformation and propaganda on social media platforms. Many people are effected by the dangerous diseases due to high intake of fast food. In a nutshell, change has brought nothing, but chaos, instability and inequality among nations.

DAY: \_\_\_\_\_

Globalisation has entirely changed the dynamics of the world. It has increased inequality and unemployment. It has created a new social order in the world. The developed countries and the developing countries. Developed countries have badly exploited the developing nations. They are taking their natural resources through free trade and pay them minimum return. Globalisation has destroyed cultural homogeneity of the nations. It created social unrest among them. It destroyed their mutual cooperation. As a result, the peace and prosperity of the nations has been destroyed.

Similarly, emergence of technology has posed severe challenges to humanitarian law. Currently, Israel has destroyed innocent

DATE: \_\_\_\_\_

DAY: \_\_\_\_\_

palestinians by using high tech power. It has violated the international humanitarian law by killing innocent children and women. War of israel and palestine has disturbed the whole world.

Almost every country is effected either economically, socially or psychologically. The issue took such a hype all around the world due to advancement of technologies. The advancement of technology gives unprecedented power to USA and Israel.

It has even posed threat to humanity.

In addition to this, emergence of capitalist ideology created a new social order in the world. It gave a hegemonic power to USA. It created two classes haves and haves not. Haves have badly exploited

DATE: \_\_\_\_\_

DAY: \_\_\_\_\_

the haves not. Thus, class conflicts increases. It increased competition among nations. Morality and honesty have been compromised by the capitalists. Capitalists may even use unsustainable means to maximize their profit. They do not care about the local citizens. They use their drinking water for their purpose. They increase pollution across the globe by using coal and fossil fuels. It badly effect the environmental sustainability. As a whole, the capitalist ideology is a serious threat to humanity.

Additionally, emergence of Artificial intelligence (AI) has negatively impacted the academic integrity of the researchers. Most of the researchers use plagiarised contents by using AI. It brings

DATE: \_\_\_\_\_

DAY: \_\_\_\_\_

no reforms in education system of the world. The researchers do not use their own creativity to present new ideas. They use the same old ideas from the existing research papers, which are already flawed ideas. Use of AI increased the culture of cheating, which is a curse to a nation's education system. It snatches the ability of thinking and creativity of both the researchers and students.

Industrialization has destroyed the climate change of the world. The whole world is facing serious climate changes. Most of the nations are facing serious flash floods, their infrastructure has badly been destroyed. It destroyed their socio-economic development. It increases the spread of hazardous

DATE: \_\_\_\_\_

DAY: \_\_\_\_\_

diseases. These are countries, they are facing severe droughts. People are dying due to water scarcity and food insecurity, especially African people. They are already poor and now the industrialization has badly affected them.

In the same manner, nuclear arms race have deteriorated the peace and prosperity among nations. Most of the nations are investing a lot of money on modern weapons and troops. It is a serious threat to the mutual co-operation and coordination among nations. It has increased illiteracy rate in developing nations, because developing nations do not invest on their education. They are afraid of their national security, that's why they invest much amount of their GDP on weapons and troops.

DATE: \_\_\_\_\_

DAY: \_\_\_\_\_

As a result, the education and health sectors have been compromised. Although, these are the fundamental rights of the people. Hence, the new nuclear arm race has even snatch the fundamental rights of the people.

The world is facing a drastic increase in hazardous diseases. It is all, because of high intake of chemicals. The use of hazardous chemical medicines is very common. People do not have basic facilities, such as sanitation, safe drinking water and clean environment. As a result, everyone is tired, depressed and weak.

To get rid of tiredness and depression, they take medicines on normal basis. It badly effects their immunity. With weak immunity they are unable to

DAY: \_\_\_\_\_

fight diseases. They soon die at very early stage of their life.

Currently, one of the utmost issue is water scarcity that the world is going through. According to UNICEF, some 1.1 billion people worldwide lack access to water, and a total of 2.7 billion find water scarce for at least one month of the year. It is because of, growing electric power plants and inefficient use of irrigation system. Electricity has brought many good changes in the world, but on the other hand it has destroyed many nations. Similarly, most of the countries are growing due to advancement of agriculture, but it has created drought like situations in many countries.

Social media has destroyed the

Social cohesion of the people. People are no longer in favor of in-person contact. Even family members do not meet for months and some cases for years. It is due to social media, people prefer to live in isolation. They do not even participate in the funerals of their close relatives. It has destroyed the quality of empathy and sense of belongingness.

In the same fashion, social media has destroyed the mental health and eyesight of the people. Because, people use social media excessively. They do not enjoy the beauty of nature. They are suffocated being at one place for longer time. As a result, they become mentally distorted. They do not see any beauty in their life. In some

(14)

DATE: \_\_\_\_\_

DAY: \_\_\_\_\_

extreme cases they even commit suicide, as they cannot control their frustration. Like wise, they are not able to see the beauty of universe with their naked eye, because they have lost their 'eyesight'.

Similarly, owing to the easy access to unethical videos and films, the number of rape cases and sexual violence has increased. In India, on average of nearly 90 rapes a day were reported in 2022. Sexual violence is even common between husband and wife.

The reason is, the emergence of internet. Most of the people are busy on internet. They waste their precious time. Instead of working for their betterment they are busy in such unethical

practices. It destroyed the social peace and harmony of the society.

Furthermore, intake of new fast-food products is very dangerous for health. It has created hazardous diseases.

Disease like cancer is now very common due to intake of fast food. According to world Health organization, over 185,740 new cancer cases and 118,631 deaths reported in Pakistan in 2022. It is such a huge human loss, it needs to be tackled before that it destroys the whole nation.

To conclude, change has destroyed the each sector of the world. It destroyed the societal stability. It has increased inequalities and war crimes.

Change has badly effected the poor nations. They are being exploited by using the new technique of globalisation, industrialization and Capitalism.

The modern technology has destroyed the social harmony of the nations. It created chaos among nations. It created social, political and economic instability among the poor nations. Emergence of AI have badly effected the quality of services. Social media has posed many threats to humanity. All in all, change has destroyed the socio-economic development of the world.
