(9.7) Genital mutilation.

## Conclusion

Thesis statement.

main idea.

The divine created Adam and Eve. Eva was created from the rib of Adam. They were placed in the Eden which means God has given equal rights for both. But in our patriarchal society women does not have equal rights. These discrimination makes our green world into blood. Women fight for their rights till first days. Some how they were succeeded. But till they do not have equal in all worlds they face inequality. But situation is more worst in third world country. History shows the struggle of women for their rights like "cephansi ki bani" and Razia Sultan fought for their rights in battle ground. The women form have a of the world population. They work more effectively and they also have more patience than man. In all of these they do not have right. They faces hurdles in many field of life. Like education, politics, Domestic violence, Media, games, Health etc. it is considered that developed countries provides equal right. But in developed countries women also faces inequality. However these countries makes law for their protection that are not implemented perfectly. In developing countries women's treated like a animal they always considered inferior authority.

## in the advent of Islam

are which things effect women progress their cultural, social and religious norms. For Example in Saudi Arabia driving of female is a (greater) Hotest issue Today. They do not allow women for alone driving and even travel without the member of family. it is also the greatest issue. how they manage male drivers they picked 3000 to girls from school. if women are stand for their Right and protect. This protection is forcefully Shutdown by their authorities. similarly in South Asia Countries women does not have equal rights. They are half of the Society. But they treated like inferior. Next come with South Asia in these developing countries women faced critical condition. They face tribal and their battle disputes. They use women for South Asia countries culture of "Karo-Kari" (The girls are given to resolve their disputes). where they treated like a shoes. For Example. A 15 Year old girl Naseem bibi ~~gave~~ who father was arrested in murdered case. The Jigga made decision. The victim family forgive him. if they gives

their daughter in victim family. The five women and heavy amount was giving to resolve dispute. whose Nassem Bibi becomes victim of this patriarchal custom. when she was just 15 years old.

First come with education, women does not have equal rights for getting education. Patriarchal society not allows girls. Because man considered a superior and breadwinner of family while women are inferior. Moreover poor families not affords the burden of education. They prefer boys to go school. For instance, they considered a girl as property of other. They will go their husband house in future. That's also the biggest reason that stops the parent to invest in girls education. Next come with families restriction. The families not send their girls school for safety concern. For instance, The attack of school in Northern Pata, it was the third attack in girl school in one month, which makes the situation more critical. Similarly, The afghan terrorist occupy the all area, and restricted the all activities of women, which makes inequality. They do not allow for education, business, games, and even not ~~come out~~ from houses with out hijab (Always)

their daughter in victim family. The five women and heavy amount was giving to resolve dispute. where Nasreen Bibi becomes victim of this patriarchal custom. when she was just 15 years old.

First come with education, women does not have equal rights for getting education. Patriarchal society not allows girls. Because man considered a superior and breadwinner of family while women are inferior. Moreover poor families not affords the burden of education. They prefer boys to go school for instance. They considered woman child girls are property of other. They will go their husband house in future. That's also the biggest reason that stops the parent to invest in girls education. Next come with families restriction. The families not send their girls school for safety concern. For instance The attack of school in Northern Pata. it was the third attack in girl school in one month. which makes the situation more critical. Similarly. The afghan terrorist occupy the all area and restricted the all activities of women. which make inequality. They do not allows for education, business, games. and Even not ~~come~~ out from houses with out hijab (Always)

The global world report shows the worst condition of female in their report 2024. These developing countries shows most devastating situation.

Secondly, Health. women are not aware about their health condition. For instance, about 40% women die due to unawareness of health. Breast cancer is worst condition. It is the worst situation. Moreover, due to societal norms female not go to hospital in time, which has made the situation more complication. For instance they are asking to use home made remedies and not goes to hospital. Next, forceful pregnancies boys. Cause unwanted pregnancy. it is more effects the women condition. Because unwanted pregnancy causes depression, health complication. For example 21% of women are die during their delivery, or die due to health condition. ~~before~~ ~~and~~ ~~his~~ ~~first~~ ~~birthday~~. which shows devastating condition. more over, if forceful abortion also shows inequality. if they know about (female) baby girls. Cause injuries, infections, that the complications. That shows the inequality of women.

Not Moved, women are economically deprived in society. They do not have education. It is the reason they are not getting better jobs. For instance, women work all times in homes and farms without any wages, which cause their social deprivation. Yet, women are depend on male of their families for basic necessities. Next, they do not have technical knowledge like man. They are not getting high wages like man. Not getting promotions due to lack of knowledge and uneffectiveness. The man considered superior authority. So all the decision are taking by men. Women most of the time are not included in meets. Or if join meeting their decision are not considered worthwhile. Secondly, they faces harassment issue in offices. The boss judge them with their personal internal appearance. For instance, promotion are given on the base of boss favoritism. These, job family are not allows their girls for jobs.

makes progress. But the condition of women are not even improve. They face domestic violence till 21 century. Women are forced for prostitution. For instance, the Zareema or her sister were victim of prostitution. Those families were forced them for prostitution.

The next comes with forceful marriages <sup>of child girls</sup>. It is also hinder obstacles ~~in~~ women progress. Situation become <sup>more</sup> worst after covid 19. The Experts predict that 2.5 million girls are at the risk of child-(forceful) marriage. which increase psychiatric issue in adolescence. Moreover, Rape

The report of Experts shows that one girl in every movement are become victim of rape. it shows the patriarchal mind of society. where women just considered a thing for peace. Next with verbal abuse, women

are verbally abuse by their family members.

At the end, women struggles to get their right. Some how they succeed to get it. But they are not getting equal rights as compared to man. They faces difficulty in every aspects of life. Make law and strictly implement them. In developed countries situation of women are better. but ~~not~~ These they also faces difficulties. But in developing countries situation is more worst. The struggles and law making hope so improve the condition of women. and they will also <sup>both</sup> enjoying equal rights in future.
