The Essay

The 21st century has brought about a massive change in the world of education. Gone are those days when teaching was limited only within the confines of a classroom. The ambition of giving anyone, anywhere the power to learn, has changed the world. Now universities offer courses through distance learning employing either traditional technology integrated and sometimes entirely online methods. Slide projectors and television-based classes have been in use since the 1950s. However, the University of Phoenix in 1980s, became the first educational institution in the world to launch a wholly online collegiate institution. Education through open universities provide many strengths to get education but at the same time, it also poses some weaknesses that raise questions its credibility. Open universities provide make education accessible

to anyone, everywhere, you can study in your own chosen setting, a cost-effective method of learning that provides education for all beyond the gender barriers but it offers some limitations such as research-work, limited practical classes, quality issues, inaccessibility to library and technology issues. Despite these challenges open universities offer significant advantages.

Open universities have many strengths that made education easier. Here are some strengths of education through open university.

One big strength of education through open university is its accessibility. Students can avail the opportunity of distance learning from anywhere from any part of a country or even from other countries - beyond borders. Open universities make education's easy access to students living in far flung areas who often cannot travel to main city areas may be due to some social values. One having an internet connection can access to university degrees through online lectures, videos, workshops and even online exams - providing education at doorstep. For example, Allama Iqbal University, the second open university in the World, provides masses access to education remotely. According to an article published in Dawn, it provides education to about 1 million students. Thus, open universities make education

accessible to anyone beyond any borders and barriers.
