

Character Building Saves a Nation

Q2

The Great wall of China was the first step of Chinese to live in peace. Twenty hundred years ago, they thought no one could climb that wall due to its huge height. But Chinese were attacked three times. Enemy had entered through gates by bribing the guards. Chinese had invested on infrastructure rather than character building of its citizens. Youth of a nation needs to be known that building a human character is the most important task than everything else in society. It is said that a nation's civilization can be destroyed by destroying the family structure, Education system, and by insulting the scholars and leaders. After degrading mother's respect, reducing the importance and reputation of educators, and demeaning the role models, no one will be able to teach human values to youth. A nation that do not focus on the importance of education, uplifting of

teachers, and encouragement of Scientists has no future.
