"Strengths and weakness of education
This is too generic Open University"

Distance Education is any of the various forms of study which is not under the continuous, immediate supervision of a teacher present with their students in classrooms

The Allama Iqbal Open University is dedicated to improving the lives of students by providing quality education at an affordable price. Like wise it has strengths as well as some weaknesses

~~To conclude the strengths of getting education through open university are convenient way, digital means, well management system and time~~

~~Some~~ Some wise the weaknesses include lack of individual attention, invaluable student-teacher interaction, non-effective evaluation and no feedback. These were the strengths and weaknesses

That comes the well maintenance of online system. In this the audios and videos of teacher are available to the student. The students can see the reactions and topics & can learn easily. They can ask questions and get answered in the same way as in live talk. It is so well that there is proper sound system, no hindrance or distortion is faced during the session. One can easily listen & take notes during the lecture. There are notes made specially for the student that have further made the learning easy. Notes are made in WhatsApp groups, any source of information can be conveyed through chat or the session is so comfortable and entertaining that an effective learning is made possible due to which the positive outcome is seen in the results.

Last fourth comes the time saving approach. At all times & for the students to prepare they are relaxed and stress free. There is no need to wake up early and getting ready for the transport as all is available online. There are no problems of covering miles and to wait for hours for the teachers to come is no more. The simple way to get the things done in less time saved for the other tasks that one has to look for, you can manage jobs and household tasks as well as family. The burden is reduced a lot. One can easily look for books like buting, news readings, magazines, letters and parties etc. Life is very easy and interesting.

After looking at the strengths of Open university education let's look at the weaknesses. There are a number of shortcomings that include lack of individual attention, inadequate student-teacher interaction, non-effective evaluations and no feedback. These are the core of education through Open university. Let's look at them one by one.

First comes the lack of individual attention. As there is no face to face interaction, teacher can't give attention to every individual. The session is not interactive as proper communication cannot be carried out as in classrooms. The guidance is not given individually, as there are number of students and it is hard for the teacher to have any eye on every one and as the face of the students are not visible. It is not possible to fulfill the demands upto the requirement.

The suggestions are...
 or what...
 The teacher is guiding as a whole, so weak students who are not vigilant or responsive are neglected. The relationship between a teacher and student is so weak. Questioning and answering session is also not as effective as it should be. Many questions are left unanswered, so the satisfaction & clarity is missing. There is no time for the huge number of queries as time is less. The teacher has to finish it in time, so this is one of major drawbacks.
