Economic interest is pivotal for prosperity and development of nation

~~Economic interest~~ is the ~~most~~ important objective of every ~~nation~~. Nation states make foreign policies according to economic benefits of their people. The ~~same~~ is the case with ~~muslim~~ countries. Economic ~~interest~~ of ~~muslim~~ states have ~~stopped~~ to ~~support~~ the ~~Palestine~~ Economic interests of the muslim countries include energy flow to USA, EU and even Israel buys the oil of muslim state from international market. moreover, the interest of the G20 which is entirely economic, Abraham accord, economic corridors such as IMEC and tourism attraction have ~~reduced~~ support for ~~Palestine~~. Also, Islamic ~~developing~~ countries like Pakistan that has ~~dependency~~ on IMF has never ~~sacrificed~~ its economic interest for the full support of ~~Palestine~~. Besides, muslim states

It does not convey any sense  
Plz work on your structure

economic dependence on the EU markets, technological dependency, and direct foreign investment from the west have stopped the support for separate state of Palestine. muslim states can boost support for the oppressed Palestinians through OIC, close trade among muslim states and avoiding dependency on the west. Therefore, the economic interests muzzling muslim support for Palestine.

To begin with energy supply, according to Organization of Petroleum Exporting Countries Report 2023. The USA had imported 37 million barrels per day from OPEC and The EU had imported 31 million barrels per day. Flow of oil is the only tool for Arabs' prosperity and economic growth. Arabs have no intention to make angry the biggest energy consumers for the sake of

Full support for Palestine. Thus, USA and EU are the ally of Israel and economic partners of Arabs.

Moreover, Abraham Accord 2020 that resulted into close economic relations is another stone on the way of Palestine state. Abraham Accord has created close ties for economic between Israel and UAE. The UAE has signed agreements that include: energy out flow to Israel, exchange of culture, technology and so on and so forth. According Reuters in 2023 the trade volume reached to 36 billion between UAE and Israel.

The UAE will never give full political and diplomatic support to Palestine because of its economic interest with Israel. Therefore economic interests are the only thing that reduce muslim support for Palestine.

Further, Gulf countries council has also confined its support for Palestine. Gulf countries council has economic relations with Europe and the United States. According to Al-Jazeera news in 2002, USA bought 12 billions of weapons from the USSR. Also, signed to increase oil production to fulfill the energy demands of EU states after the outbreak of Ukraine war. Gulf countries profound economic interests have hindered them to support Palestine or again use oil embargo. Thus, GCC has economic interest with the ally of Israel and aims not to spoil the ties.

Similarly, economic projects have also pushed muslim states not to rise Palestine issue. IMEC which was announced in 2023 for the connection of India,

Middle East and Europe. This project has buried the idea of Palestine under the sand of Middle East. The Arab nations including KSA agreed to normalise relation with Israel. Consequently, it led to Oct attack on Israel by Hamas. Therefore, economic projects have increased the interest of Muslim states to avoid supporting Palestine.

Moreover, underdeveloped countries like Pakistan that has dependence on IMF also avoids to support politically the issue of Palestine. Pakistan has utilised 23 IMF loans so as to maintain economic growth. USA is the largest contributors of loans in the IMF. Pakistan due to full dependency on the IMF is unable to

Sacrifice economic interests for political support of Palestine. Thus, economic interests reduce the capability of muslims to support Palestine.

Besides, muslim states have enormous dependence on the European markets. EU is one of the closest friends of Israel. EU has supported Israel on every platform. Muslim states who try to make threats to Israel always suffer from sanction of group of 7 countries. Iran is the most tremendous example of sanctions. Therefore muslim states do not like to cut their supplies of import and export from the European market, for the sake of supporting Palestine.

Moreover, tourism which plays profound roles for the growth of economy is another

concern for muslim states.  
UAE has been attracting  
tourism since its creation from  
west. According to WB Report 2023  
on Economic Growth, Tourism  
in ~~the economy of UAE~~  
contributes 35%. Tourists came  
from Israel, USA, EU, Africa and  
South Asia. Therefore, isolating  
Palestine from the Israeli rule  
is a direct threat to  
UAE's economy. Thus, economic  
interests have given up muslim  
states to support Palestine.

Moreover, technology  
which plays particular role  
in the growth of economy also  
make Islamic states dependent on  
west. Technological machines like  
crop cutting bulldozers, water supply  
machines, computers for digital

economy have made muslim countries dependent on the west. muslim states like IRA that has been buying solar cars from Japan and EU have no capacity to harm economic ties. Therefore, muslims states are unable to support struggle of Palestine. Work on transition of ideas

Moreover, foreign direct investment plays a crucial role in the growth of economy. Foreign investment always comes from the developed nations. These developed nations includes Canada, USA and EU. For example the Barric Company of Canada has been operating in numerous muslim countries. Consequently, the company has contributed to the GDPs of muslim countries profoundly. The developed countries will never invest in those countries that create threat to their national

~~interests. Therefore, mutual interest  
of Muslim countries muzzling support  
for Palestine.~~

moreover international  
sanctions vanish the economic  
growth of countries. Muslim countries  
do not interfere in the issue  
of Palestine politically and  
avoid sanctions. According to  
**BBC Report 2024** when the  
Iran increased military and  
diplomatic support to Hamas.  
The US called upon its alliance  
especially SA to impose economic  
sanctions on Iran. BBC reported that  
600 sanctions have been imposed  
on Iran. Thus, Muslim countries avoid  
to bear the pain of economic  
sanction for the support of  
Palestine.

Moreover, Muslim countries have been earning enormous amounts from European markets. Muslim countries like Pakistan, African nations and Arab states have been importing and exporting agriculture based products. These products include wheat, mangoes and dry fruits. Pakistan fulfills its food needs such wheat. ~~and exports to European countries mangoes etc.~~ These contribute millions in the economy of the country. Thus, spoiling nations like Iran may hurt the economy of Pakistan entirely.

~~New muslim states also have numerous options to support Palestine. Also, these options will maintain friendly ties with west.~~

First of all, Muslim countries should utilise OIC. Muslim nations

Should create peace keeping force under the charter of OIC. This will assist the Palestine to have peace in the region. OIC may send peace keeping force to Palestine to tackle the influence and crime of Israel in the muslim land. moreover, OIC should also demand in UN and its organs full membership to Palestine. Thus, muslim nations can assist the Palestine rather than direct confrontation with West.

Secondly, increasing free trade can enable the muslim nations to be independent. muslim countries should form one of the free trade organizations like World Trade Organization. This will improve the economic

Date: \_\_\_/\_\_\_/20\_\_\_

ties of the countries. Also,  
 such organization will reduce  
 the muslim countries dependency  
 on the european market. Thus,  
 in the future muslim states  
 may take bold steps to  
 assist Palestine.

Also, muslim countries should  
 increase technological, agriculture and  
 economic based cooperation among  
 one another. This will reduce the

muslim countries dependency on  
 the west. For example, Pakistan

has opened foreign investments in different  
 sectors. These sectors provide investment in  
 defense, energy, agriculture and mining.

Muslim nations should invest in

such projects to avoid dependence

on west. Thus, becoming technologically

independent may be able to deal with

oppressed Palestinians.

In short, economic interests of muslims have been isolating palestinians from independence. muslim nations have high energy resources, tourism attraction regions, land's and oceans have the capability to surround palestine. muslim nations

Short sentences plz

that have made their countries dependent on the technological, agricultural and economic markets of USA and EU can avoid these dependency. Avoiding dependency will enable muslim countries to take independent steps. These independent steps will not only save their economies from western sanctions, but also assist the oppressed palestinians. Therefore, economic interests of muslims will not harm

Support for the Palestine.
