

Dos and Don'ts for General Science & Ability Paper

5-June-21

Wednesday

Hi there, you've done well. Know that acquiring knowledge is one thing and reproducing it in paper according to what's asked is another. There are a few things I would like to highlight.

1. A 5 marks part requires 2 sides (not more than that) of a paper. Know that there can be two or three parts of a question and their marks are divided accordingly. So address all of them in a just manner.

2. Focus on time management. You get 35 minutes to solve one question and about 8 minutes per 5 mark part. Manage your time accordingly.

3. You need to understand that your paper is supposed to look more scientific than theoretical. So, add flowcharts and diagrams where required.

4. Your handwriting and neatness can be really impactful. Avoid cutting and overwriting.

5. Focus on your spellings and your grammar.

Here, in GSA there's no deduction in marks but your expression will definitely create an impact.

6. In ability portion, give explanation for analytical ability question in words. You need to understand that a 5 mark part requires all steps written and explained.

Good luck for CSS 2025. You're gonna rock in sha Allah. :)

$$= \frac{22500 - 18000}{18000} \times 100\%$$

$$= \frac{4500}{18000} \times 100\% = \frac{450}{18}\%$$

$$= 25\% \text{ per decade}$$

Hence

Percentage increase in the population of village is 0.25% in a year

Part b:

A soap factory makes 600 units in 9 days with -----

Solution

Data #1

600 units of soap were made in 9 days with the help of 20 machines

Data #2

18 machine will made soap in 12 days
To find the units of soap

Let units of soap are x .

Units of soap : No. of days : No. of machines
 $600 \uparrow : 9 \uparrow : 20 \uparrow$
 $x \uparrow : 12 \uparrow : 18 \uparrow$

$$\frac{x}{600} = \frac{12}{9} \times \frac{18}{20}$$

$\frac{x}{6}$

$$\frac{x}{600} = \frac{12}{10}$$

$$x = \frac{12 \times 600}{10}$$

$$x = 720 \text{ units}$$

As x presents units of soap
 \therefore Soap = 720 units

720 units of soap can be made in 12 days with the help of 18 machines.

PART : C

A car covers a distance of 450m in 1 minute - - - -

Solution:

For car

$$\text{Distance} = 450\text{m}$$

$$\text{Time} = 1 \text{ min} = 60 \text{ sec}$$

For Train

$$\text{Distance} = 69 \text{ km}$$

$$= 69 \times 1000 \text{ m}$$

$$= 69000 \text{ m}$$

$$\text{Time} = 45 \text{ min} = 45 \times 60 \text{ sec} = 2700 \text{ sec}$$

$$\text{Speed} = \frac{\text{distance}}{\text{time}}$$

$$\begin{aligned}\text{Speed of car} &= \frac{450 \text{ m}}{60 \text{ sec}} \\ &= 7.5 \text{ m/s}\end{aligned}$$

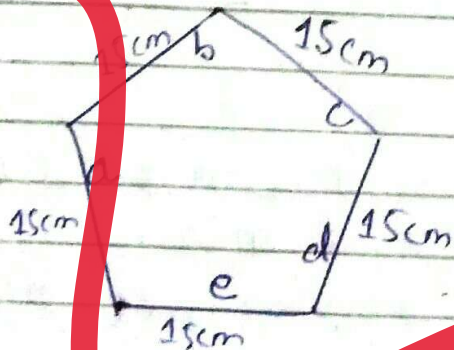

$$\begin{aligned}\text{Speed of train} &= \frac{69000 \text{ m}}{2700 \text{ sec}} \\ &= \frac{230 \text{ m}}{9} \\ &= 25.5 \text{ m/s}\end{aligned}$$

$$\text{Speed of car} : \text{Speed of train} = 7.5 : 25.5$$

PART: D

Find perimeter of a pentagon with each side equal to 15cm

Solution:

Perimeter of pentagon = sum of all sides of pentagon

$$= a + b + c + d + e$$

$$= 15 + 15 + 15 + 15 + 15$$

$$= 75 \text{ cm}$$

\Rightarrow Perimeter of given pentagon is **75 cm**

Question # 2

Part a.

What is IQ? What are factors which affect IQ?

Answer

Abbreviation:

IQ: Intelligence quotient

Definition:

IQ refers to a person's intelligence. It is a person's ability to think effectively. It's level varies from person to person, which depends on some factors.

Factors affecting IQ

— Environment

Good environment have positive effects on IQ leading to the high intelligence quotient.

— Parenting

During a person's childhood, how his parents treat him have a deep effect on his IQ.

— Educational background:

A good educational background leads to the high intelligence level.

— Problem Solving Task.

A person will have high IQ level who solves more problems when compared with a person with low 'less' problem solving.

— Health

Good mental and physical health helps in the high IQ level of a person.

Part b.

What is the circumference of a circle with radius 4cm?

Solution:-

Circumference of a circle = $2\pi r$

where,

r = radius of circle

Here $r = 4\text{cm}$

Circumference of the given

$$\begin{aligned} \text{circle} &= 2\pi r \\ &= 2\pi (4) \end{aligned}$$

$$\begin{aligned} &= 8\pi \\ &= 8 \left(\frac{22}{7} \right) \\ &= \frac{176}{7} \\ &= 25.14 \text{ cm} \end{aligned}$$

Circumference of given circle is **25.14 cm**

Part C:

Ages of 5 students is 20, 22, 21, 21, 23. Find mean, median, mode and range.

Solution:

$$\Rightarrow \text{Mean} = \frac{\text{Sum of observations}}{\text{Total no. of observations}}$$

$$= \frac{20 + 22 + 21 + 21 + 23}{5}$$

$$= \frac{107}{5}$$

$$= 21.4$$

$$\text{Mean} = 21.4$$

\Rightarrow **Median**

Arrange the ages in ascending order.

20, 21, 21, 22, 23,

Modal observation is 21
which is median

$$\text{Median} = 21$$

⇒ Mode: the most repeated value.
In the given data

Age	Students
20	1
21	2
22	1
23	1

$$\text{Mode} = 21$$

⇒ Range = maximum age - minimum age
 $= 23 - 20$
 $= 3$

$$\text{Range} = 3$$

Part: d

Tahir started a business
with a capital of - - -

Solution:

Tahir's share	: Umar's share	: Osman's share
15000×12	: $30,000 \times 7$: $45,000 \times 4$ ($\div 1000$)
15×12	: 30×7	: 45×4 ($\div 5$)
3×12	: 6×7	: 9×4 ($\div 3$)
12	: 2×7	: 3×4
12	: 14	: 12
6	: 7	: 6

$$\text{Tahir's share} = 6x$$

$$\text{Umar's share} = 7x$$

$$\text{Usman's share} = 6x$$

$$\text{Total profit} = 406,000$$

$$6x + 7x + 6x = 406,000$$

$$19x = 406,000$$

$$x = \frac{406,000}{19}$$

$$x = 21368.42$$

$$\text{Tahir's share} = 6x = 6(21368.42) = 128210.52$$

$$\text{Umar's share} = 7x = 7(21368.42) = 149578.94$$

$$\text{Usman's share} = 6x = 6(21368.42) = 128210.52$$

SECTION-I

Question #01

Part a.

Enlist the available sources of renewable energy in Pakistan and suggest policy options to utilize these sources to overcome the present energy crisis

Answer:-

Renewable energy:

Energy collected from naturally replenished resources on a human timescale such as wind, tides etc.

Renewable Energy Sources:

- Wind Power
- Hydropower
- Solar Energy ✓
- Biomass and Biofuel
- Geothermal Energy

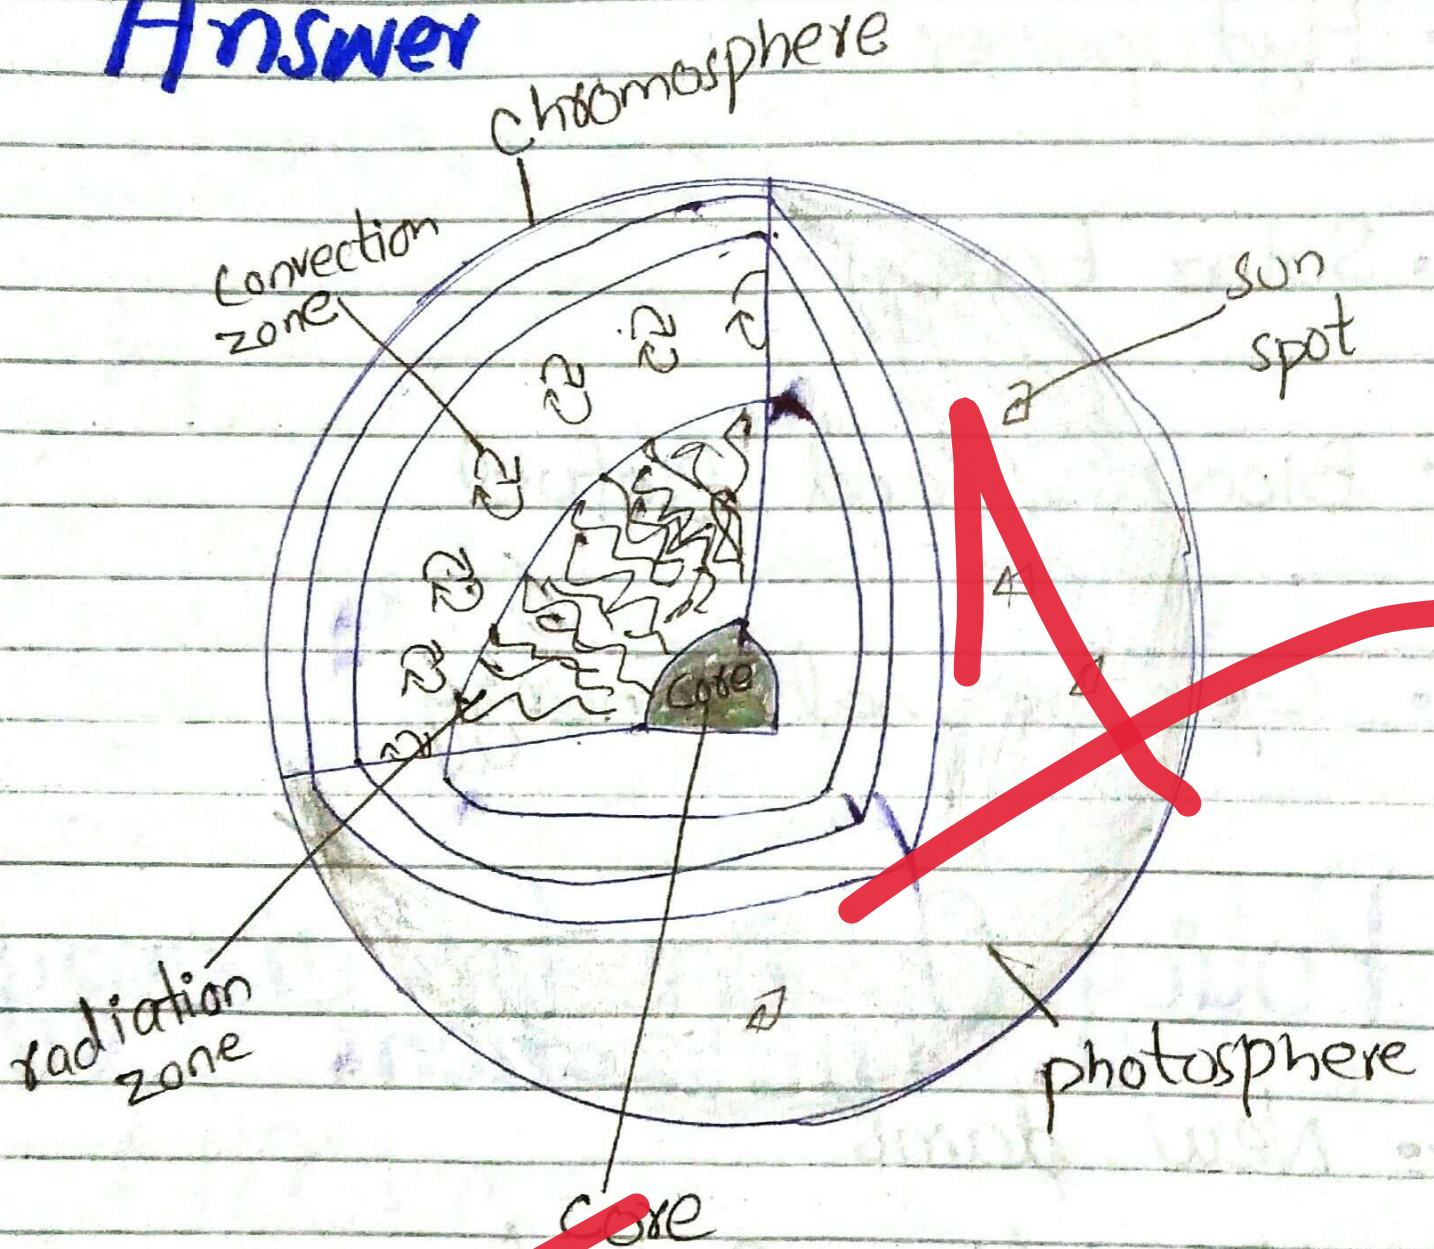

Policy Options for energy utilization.

- New dams
- Population Control
- Politician's Consensus
- Government Far-sightedness
- Active media
- Proper use of natural resources and modern technology ✓

Part b.

Explain Structure of Sun

Answer

Part C

What is ceramic material?
Is it possible that ceramics
can be recycled?

⇒ Ceramic:

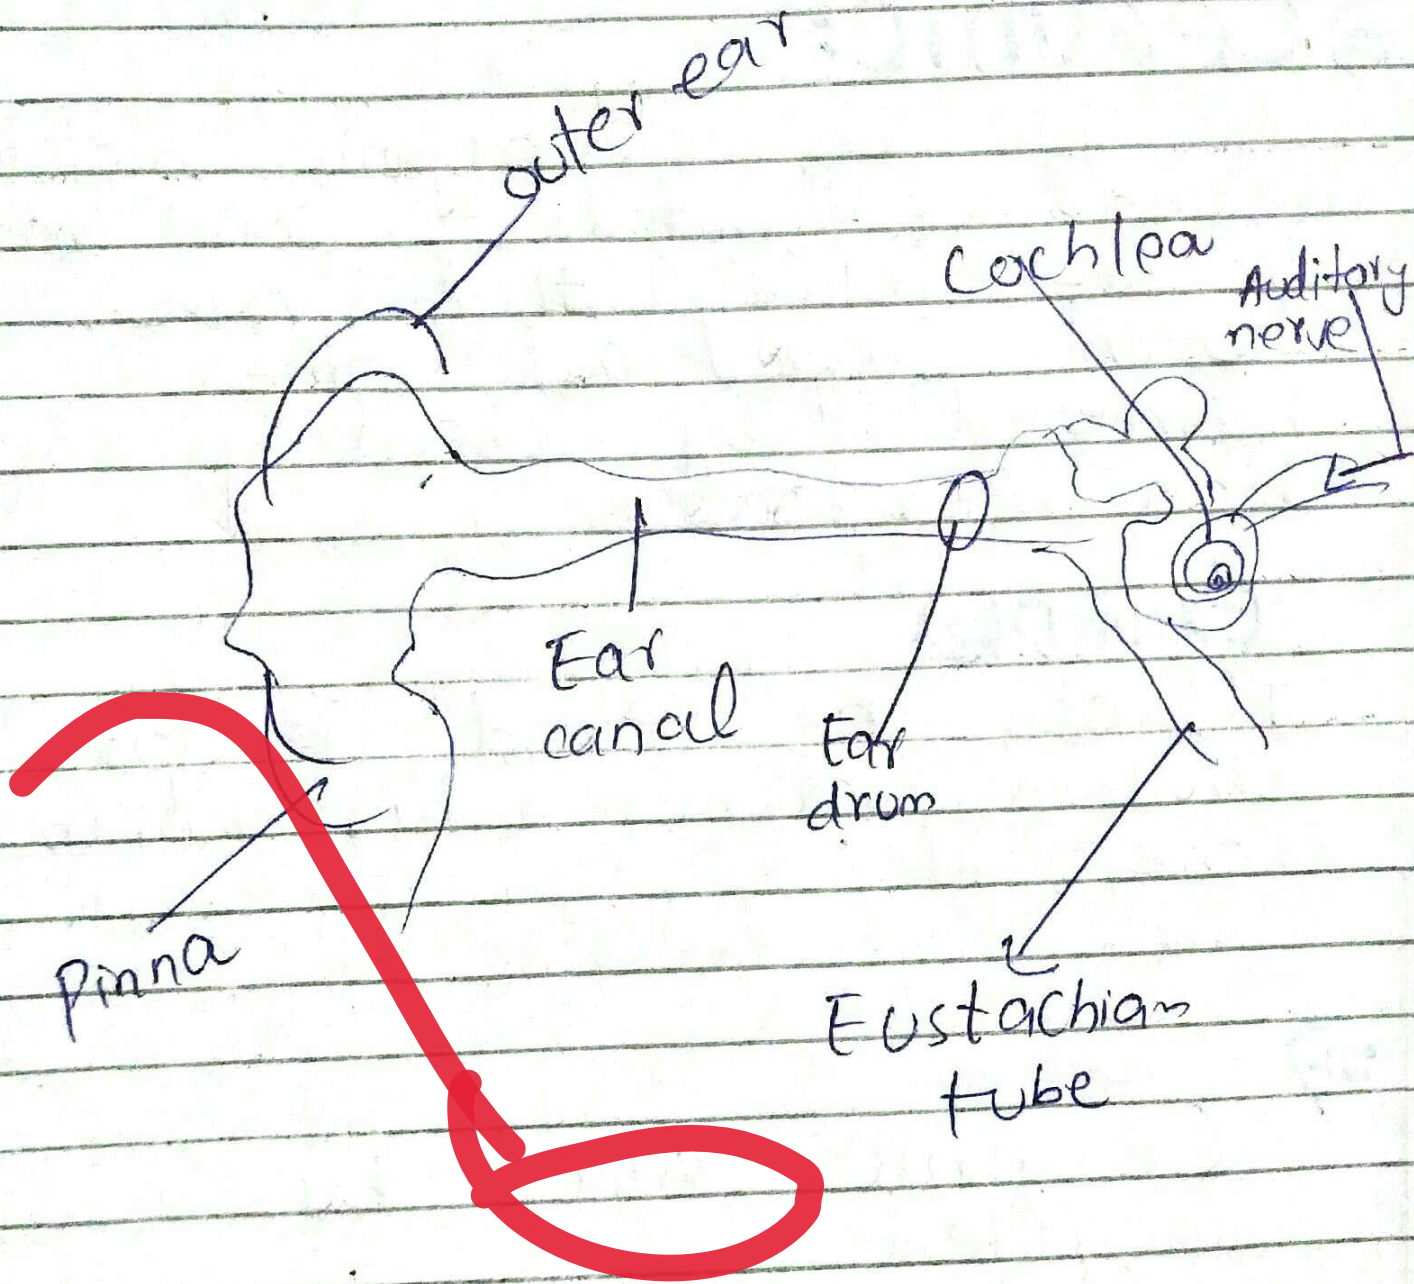

It is an inorganic metallic and non-metallic solid made up of clay that have been shaped and then hardened by heating to high temperature.

Examples

It can be found in space shuttle watches, airplanes (nose cones) etc

⇒ Ceramics can be recycled.

Part d. Ear's Structure

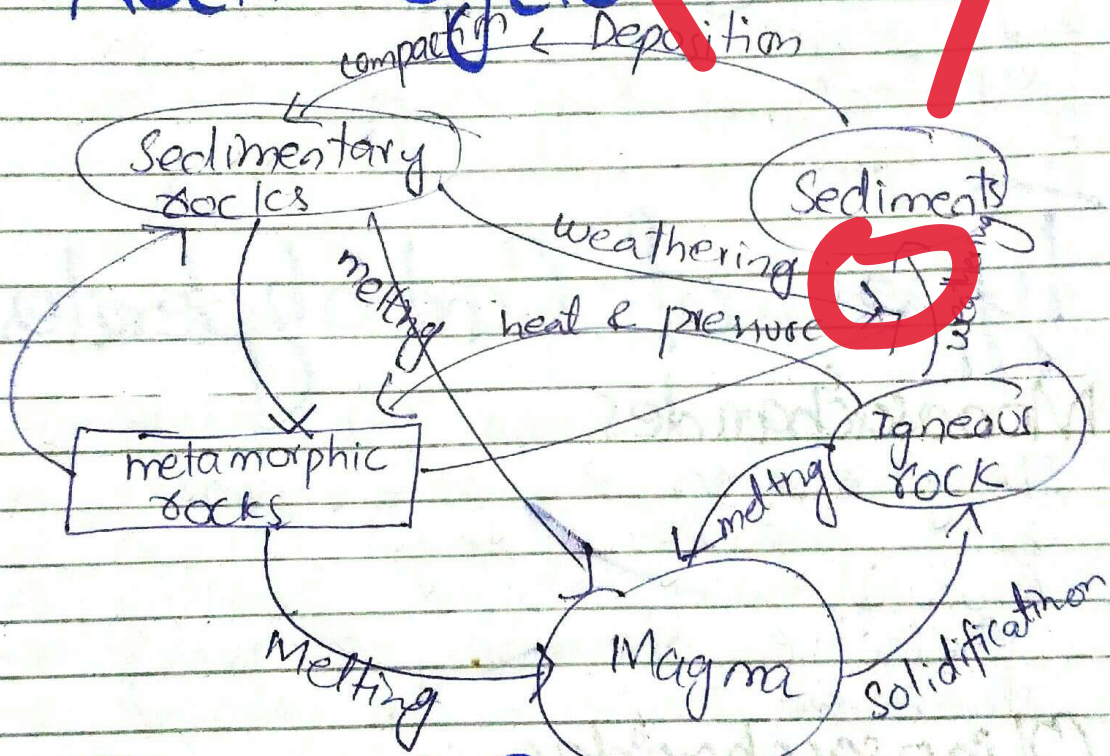

Question #2

Part a

Define rocks formation, rock cycle and different types of rocks.

Answer

Rock Cycle

Types of Rocks

1- Igneous

2- Sedimentary

3- Metamorphic

Part c:

Explain carbohydrates and its types.

Answer:

Carbohydrates:

They are the human body's key source of energy. They provide 3.79 calories of energy per gram.

Types of Carbohydrates

Monosaccharides

They are simple sugar & cannot be hydrolyzed e.g.

- Glucose
- Galactose
- Fructose

Oligosaccharides

They are compound sugar that yields 2 to 10 molecules e.g.

- Sucrose
- Lactose
- Maltose

Polysaccharides

They are compound sugar and yield more than 10 molecules

e.g. starch, cellulose

Part d:

What are the benefits of balance diet?

GS questions require proper explanation

Answer

Add proper explanation to get marks

Balance Diet

A diet that contains adequate amount of all the necessary nutrients required for healthy growth and activity.

Benefits of Balance Diet

- Helps in weight control
- keeps a body energized
- Boosts immune system
- support heart health
- Prevents illnesses
- Provides all important nutrients
