Question 08

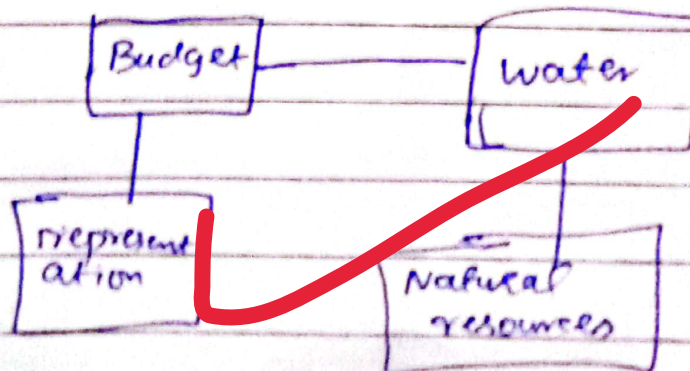

and solutions

Reasons for unfair distribution
of resources and '

1- Introduction

Since its inception, this problem is inflicting Pakistan. The reasons are vested interests, population disparity, provincial discords hate against each other and centralisation of power. The solutions could be devolution of power, revisiting sharing formulae, and devising proper sharing formulae.

2- An overview of Conflicts on Sharing

3- Reasons for unfair distribution of resources

i) vested interest of political leaders

Certain political actors want more resources than others. They do not prefer equitable distribution. The political leaders of provinces do not agree on common grounds.

ii) Centralisation of power

This centralisation divides resources with keeping in mind its biggest share. Federal government is responsible for this centralisation of power. Due to centralisation, others do not get their fair share.

iii) Provincial discords

Sindh and Punjab
↓

Conflict on water

These conflicts pose a greatest difficulty in sharing equitable resources.

iv) Rising Hate among the people of provinces

The political leaders also remain under the influence of this hate. As a result, they sought for larger share of their provinces. This creates unfair distribution.

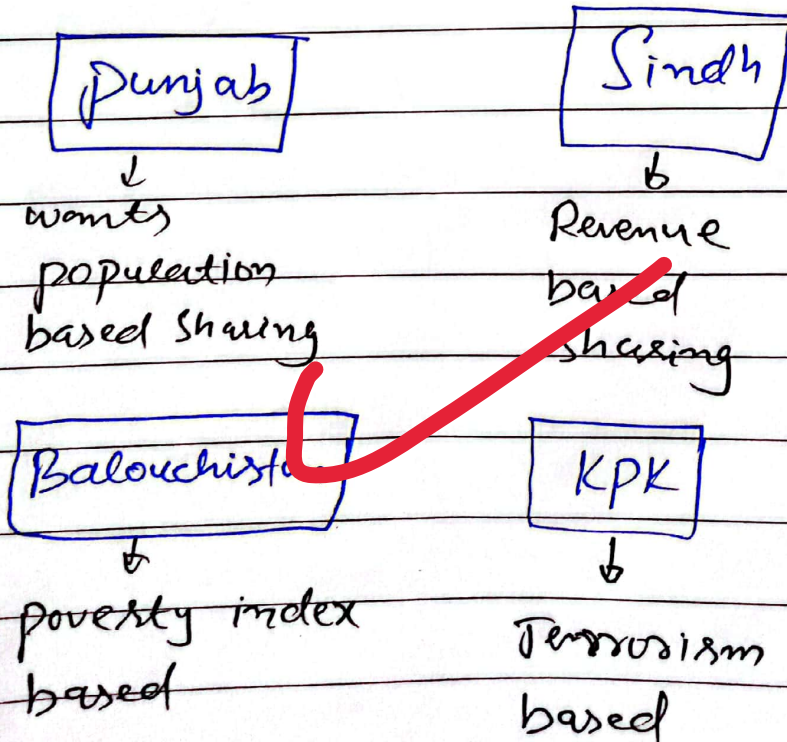

Provincial leaders → want more resources
↓
Under the influence of hate

v) Population Disparity in Provinces

Different provinces have different population number. The distribution of population creates unequal distribution

- NFC = - Punjab large share
- Balouchistan Small

vi) Lack of Consensus among provinces on sharing

This creates a problem of proper sharing.

4- Methods to achieve equal distribution of resources

i) Building a consensus among provinces

All provinces should be gathered on a single consensus based power and dist resource sharing. This consensus could bridge the gap.

ii) Devising a proper sharing formula

only this type of sharing
formal could address the
economic inequalities.

iii) Decentralisation of
power

The provinces
should be allowed to manage
their own resources. With the
intervention of federal government.
This could provide a sense
of power to provinces regarding
managing their resources.

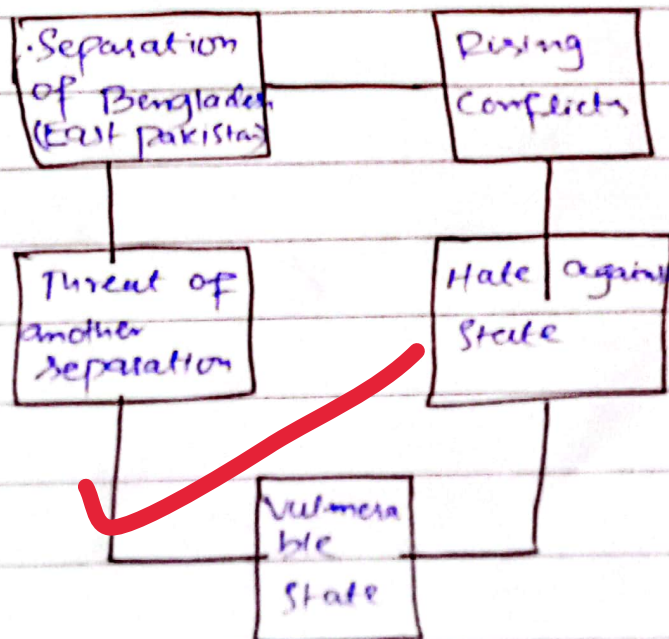

iv) Keeping Aside vested
interests by political leaders

The person who
are in authority should keep
aside their personal grievances
and work for the welfare
of all provinces.

v) Eradicating inter-provincial discords

The eradication of provincial discords could provide a viable consensus for distributing equal resources among the people. Conflicts management can also reduce personal grievances of the political leaders.

5- Consequence of unequal distribution: An overview

These issues could easily be emerged due to unequal distribution of power.

6- Conclusion

The unequal distribution of resources in Pakistan stems from various internal causes. This unfair distribution could result in horrible consequences. However by adopting practical strategies, future grievance can be mitigated.

Question 04
