Also learn to listen other's point of view and convey own point of view in a decent manner.

The Essay

① Introduction

"Education is the movement from darkness to Light." - Allan Bloom. Education is not just gaining knowledge but it is evolution from idiocy to wisdom. Skill and Higher Education both complement each other, as education contribute to gain knowledge and understanding, while skills are the practical implementation of the knowledge. But having a concept of acquiring skills only is totally wrong concept because the skill that need to be applicable comes from the knowledge that we get from higher education.

② Main Body

"Higher Education" leads towards the last phase of the educational learning process. It is university level, whereas "Skill acquisition refers to improving hard or soft skills by practicing." Both of them complement each other as both of them have their own importance according to their needs. Let's know the benefits of both so that we can conclude which is more important.

2.1) Pros of Higher Education

2.1.1: Social Development:

Individuals getting higher education get social skills by the institution and the environment they get there. From fellows & friends
