- Poor becoming poorer and rich becoming richer.

## 2.5 Deterring economic growth and foreign investment

- Moral erosion has dire consequences; ~~that~~ that are seen in the form of trembling economy.
- Foreign investment reduces to a new low.

## III Conclusion

## The Essay

One cannot imagine a state, nation or society where its people have hit the lowest scale of moral values, and expect a prosperous life. The ills seen in a society are directly linked to erosion of basic moral values of its people. Same is the case Pakistan. The root cause of all the crisis in Pakistan is none other than the lack of morality. The ~~eco~~ prevailing economic crisis of the country has its roots in lack of ~~god~~ doing deeds in every individual. Everyone strives for the benefit of themselves, completely ignoring the rights of other people. Pakistan nation has lost its moral values and it has resulted in today's Pakistan where the economy is sliding down the lane and all other possible social evils are prevalent.

First and foremost, the lack of Islamic knowledge has made everyone evil. The religion teaches basic ethics. The nation has forgotten it and as a result, a depressive image of the nation circulates. People have lost the basic definition of what is right and what is wrong. If a certain task, irrespective of it.

being good or bad, gives them benefit. If it is good for them. People have lost empathy. If it is beneficial for them, they do not care about other's benefit. They have re-defined religion and cultural morals and blurred out the otherwise the prominent line between good and bad.

Another reason for the moral decay is absence of ethical leadership. Morally corrupt leaders are made the heads of the country, who instead of focusing on the prosperity of the country, works for their own benefits. Such leaders are quite apt in exploiting the poor and less powerful for their evil agendas. These leaders then bring up the same morally corrupt and evil people to the forefront by giving them authoritative positions. This leads to a lack of trust between the leaders and the common men. This leads to further deterioration of the state and its resources.

This lack of trust between the government and its people and the lack of moral values leads to the social unrest. The people go violent when they do not see

their rights. This leads to the social unrest, Pakistan witnesses every now and then which leads to the political instability. Lawlessness has also made the situation worsened. All this combined leads to the social and political unrest.
