

## Brainstorming

Poverty leads to immorality  
materialistic approach → leads to immorality

Corruption → economic structure  
down, less justice to  
everyone, everyone is involved  
in corruption.

Inefficiency.

people don't know their job  
lack of sense of owning.

team spirit is lacking  
money is everything, moral values are  
not given priority.

due to fear of dishonest  
people, it is difficult to  
correct society.

Society as a whole is  
non-responsive

loss of pride in honesty,  
artificialness, less joy

lack of dedication,  
Sincerity, no value of  
life, negative impact of  
social media.

## Introduction

### Hook-

### Background

Topic - Despite the downfall, because of economic reasons, the main reason is of loss of morality that leads to destruction.

Subtotal to the above statements

- a) poverty leads to downfall
- b) low budget
- c) less facilities, dependence of foreign countries
- d) many essential society
- e) Brain drain
- f) imbalanced distribution of wealth

Primary leading cause seems to be economic, but the main reason is immorality that leads to downfall.

As a developing country, it is always struggling to be prosperous so it faces hurdles as a result. Firstly, corruption is the leading cause of downfall. The people are selfish; they have priority of their self interests. Everyone is running after his own needs as a whole the society is neglected. The rich are getting richer & poor becoming poorer. As taking about downfall, on the other hand, the poverty plays a major role. The country faces major drawbacks in terms of resources, machinery, equipments. All sort of scarcity of facilities are unfavorable for growth of industries.

Then next comes the non response  
of society whenever any  
difficult situation comes, the  
people are not ready to  
help each other. The unity is  
not there among people. So  
as a whole due to lack of  
team work, country is not  
growing. People have become  
unaware of the fact that  
without support there are no  
chances of survival. While on  
the same time, the less budget  
causes the country to not progress.  
The country has been taking  
loan from foreign countries &  
importing expensive items which  
it cannot manufacture, so to fulfill  
its people requirements, it is  
continuously dependent for its  
needs. This becomes a reason  
for its shortcomings.

After this comes the lack of  
dedication & hardwork among  
all people leads to the downfall  
The society is not dedicated  
towards hardwork & they are  
looking only opportunity that  
comes to them. They just want  
comfort & they want to do  
nothing. For the positive result, one  
must accomplish its goals by  
hardwork, patience & trust in  
God. Our people are lacking  
behind in all respects. Moreover  
when it comes to economic reasons,  
we lack in terms of facilities  
for improving our situation. We  
have less quality products, machines  
that are a must for countries  
development.
