

Essay:

Artificial intelligence is not all evil - It can promote social Good, too.

Number Intro

Introduction

Thesis Statement: "Where artificial intelligence has raised some concerns about its potential negative impacts, it also has the capacity to promote significant social benefits for the society."

benefit and social good are separate elements

~~Main Body:~~

Do not write Main Body as a heading

I. Evil side of Artificial Intelligence

- a) - Job displacement
- b) - Autonomous weapons danger
- c) - Security risks and private invasion

Write these as phrases

separate points

Privacy

II. Political insecurities by Artificial intelligence.

Discuss these under the evil side. why separate these points

Not relevant

- a) - Political control and surveillance by powered AI
- b) - Manipulation of public opinion and political discourse
- c) - Economic disruption and instability
- d) - Geopolitical tensions over A.I resources.

overlaps with point I(c)

Why is that evil?

III. The social benefits of Artificial Intelligence

~~A) Health~~

- a) - Improvement in diagnosis process.
- b) - Discovery of cancer treatment by artificial intelligence.
- c) - Advancement in disease preventions.

one single point

example not argument

~~B) Education~~

Other than introduction and conclusion there should be no one worded headings in the outline

- a) - Personalized learning and adaptive education
- b) - Providing facilities for disable people
- c) - Improving educational skills at modern level.

a and c are benefits not points for social welfare

Elaborate? what role of AI in this?

two very separate domains, why merge them in a single heading

~~C) Food security and Environment~~

- a) - Food waste reduction and recovery.
- b) - Sustainable resources allocation.
- c) - Environmental monitoring and conversation.

elaborate

is what content?

~~d) Economic development~~

- a) - Job creation
- b) - Creating innovation and entrepreneurship
- c) - Increasing productivity and economic growth.

These are benefits not social good

IV. Conclusion

- a) - Comparison of evil and good ideas, ^{sentence structure} benefits by Artificial intelligence
- b) - Restatement of thesis.
- c) - ~~Personal opinion.~~ ^{No} - No new information in conclusion

The Essay

Artificial intelligence (A.I) has been a topic of intense debate in recent years. ^{Sentence structure} Is artificial intelligence remain bad all time? or is it portrayed as myth? That is a question which will elaborate the thesis statement that: Artificial intelligence is not all evil- it can promote social good, too. where artificial intelligence has raised concerns about its potential negative impacts, it also has the capacity to promote significant social benefits for the society.

Incoherent? How does reality of AI compare with it being evil or not?

Do not write like this. Do not address your writing

Where do inverted commas close?

Thesis statement should serve as a concluding sentence of the intro

~~redundant~~

The whole essay is your opinion and analysis. You are to write as 3rd person. Do not say "It is my opinion" or "I believe"

Whether something is a myth or not is not a debate of the this topic

Wrong use of comma in sentence structure

Therefore, I firmly believe that Artificial intelligence is evil at all and in reality,

No structure to introduction.
No Hook, no overview of outline

Day:

Artificial intelligence can promote social good too in various fields of life.

Essay does not follow outline. According to outline your paragraph should be about evils of AI.

First, Artificial intelligence has revolutionized the society to its modern level. In medical field, it improved the medical research and diagnosis process. Now Cancer ^{is curable}

If you make different subheadings in the outline that means these points will be discussed in separate paragraphs. Your outline provides a reading guideline for your essay.

powered Artificial intelligence. Additionally, AI can help treatment plans, leading to more effective and targeted care. Furthermore, Artificial intelligence is providing remote consultations in developing countries. it revolutionized the health sector.

That's not AI that is simply communication technology. No example, no analysis/ too many points and none is properly articulated

Second, A.I is improving education system at ^{supreme} advance level. It has driven adaptive learning to enhance learning outcomes and accessibility.

It is providing support to the students that they need to identify their learning gaps and achievable goals.

Benefit not social good
