Name: Naveed Ali
Paper : English Essay
Date : 7/5/2024
ID : 32359, OB-59

Your rough work should be at the back. Your presentation needs to be formal. This compromises that. It is the planning process not the final draft. It is for your understanding. Doing this in front where it is visible to examiner can be highly detrimental to your essay.

Artificial intelligence is not an evil. It can be simple tasks good too.

A great change in motor car Industry.
Positive impact on healthcare.
Easyness of office work
AI can Trigger Brain ideas
Minimize error ratio
Task completion in minutes

Mind map

World in hands
Changed the dynamics of education system. social welfare
improved science and Technology
Improved Telecommunications.
Environmental conservation
Powered Educational tools and platforms.
improved business strategy.
Improved Travelling and Transportation.
Increased Robotics.
Made smartphone more proficient
Revolutionized the era of fifth generation computers.
Increased Globalization.
Relief to print and press media.
AI Based Applications and softwares
AI Algorithm behind various softwares.
Belief on AI more than human mind.

Scanned with CamScanner

Outlines

1. Introduction.
   - 1.1. Definition of AI
   - 1.2. overview of AI
   - 1.3. Thesis statement.
2. Main body
   - 2.1. Positive impact on healthcare
     - 2.1.1. Enhanced diagnostics and treatment through AI Algorithm.
     - 2.1.2. Increased patient outcome and personalized medicine.
   - 2.2. Easyness in office work
     - 2.2.1. Task completion in minutes.
     - 2.2.2. Make it easy to enter large data into computers.
     - 2.2.3. Minimized error ratio
   - 2.3. Science and Technology
     - 2.3.1. Advancement in Telecommunication.
     - 2.3.2. Made smartphones more efficient
     - 2.3.3. Revolutionized the era of 6th Generation computers.
     - 2.3.4. AI Based softwares.
     - 2.3.5. AI Algorithm behind softwares.
     - 2.3.6. Print and press media.

This will be discussed as part of intro so no need to number these.

No definitions in introduction

Do not write the heading "Main Body" in your outline.

Positive impact of what? Use keywords from the topic.

ease

That's benefit not personal good.

What the social benefit or good here, this is either personal or economic benefit.

AI promoting social good in the domain of Science and technology

Why so many points in this domain and so few in other headings. There is no demand in the topic to focus specifically on this segment. Equally distribute the headings

None of these belong to the category of social good.

Scanned with CamScanner

2.4. Better impact on education system.
- 2.4.1. Powered educational tools and platforms.
- 2.4.2. Changed the dynamics of education system.

These are system based changes not related to promotion of social good.

2.5. Positive impact on ~~Auto~~ vehicle industry.
- 2.5.1. Robotics.
- 2.5.2. AI Based vehicles
- 2.5.3. Improved Travelling and Transportation.

2.6. Increased Globalization.

2.7. Environmental Conservation.

What about the main headings of these points. There should be uniformity in the outline

3. Conclusion.
- 3.1. Recap of the positive impact of AI.
- 3.2. Importance of AI utilization.
- 3.3. AI as a tool for positive societal change.

Why only the positive impact, cover the whole essay

What about the evil that AI promotes?

No new information in conclusion.

How is that different from 3.1

Be mindful of a general benefit and something the can be considered social good. For example: AI making education tailored to a student's need is benefit. but AI increasing the reach of education is a social good.

Don't attempt topic from just one dimension, look over various perspectives. the topic has already asked you about 2 and you have only attempted one.

THE ESSAY

Start the intro with a hook or an attention grabber

No definitions in introduction

Artificial intelligence is the technology that enables computers and digital devices to learn, read, write, and create and analyze. The world is changing its dynamics day by day because the humans is trying to get are advance since his birth. As the world is getting evolutionized every aspect of mankind is getting to be updated. same as is the case of artificial intelligence. From the Birth of computers in 20th century the computer and digital devices technology are getting better day by every passing day. Firstly discovered computers are as big as a room and approximately 10 people will work on that computer. Through time this technology is changed. By the end of 20th century. the Technology is Transformed From big computers to small computers and operating system like window was developed by microsoft company. At the Teh end of 20th century mobile phones were discovered foo the first time in the history of humans. this changed the communication method between the humans bieys of all time. By the biggining of 21st century symbian smartphones are discovered and different applications

Sentence structure

evolving

not a word

Sentence structure

Irrelevant. The topic is not about creation and invention of AI.

The background should be in context of the topic. Not general history of one of the elements of the topic.

Irrelevant

Scanned with CamScanner

page: 5

No structure to intro
No attention grabber
no summary of outline

like Facebook, Youtube, Instagram were discov-ered firstly. In recent 20 years the Technology is advanced that changed the world. A room like computer where 60 peoples were working is changed to small laptop with a huge amount of stora-ge space and could be managed by only one person. The AI an evil as it brings many greatful applications and uses with it. It changed the educational system, Environment impacts, improved healthcare system, science and technology. So, Despite concerns, AI possesses the potential to foster social good.

Irrelevant

Sentence structure

Too much detail for thesis statement.

Artificial Intelligence since its discovery made the world a global village. it made advancement in every field of study, research, bussiness, mobile phone industry, education system and healthcare.

What heading in outline denotes this paragraph?
It's neither transition nor an arfument.

Address the argument and link it to the topic in the topic sentence of the paragraph

Artificial Algorithms can analyze medical images such as X-rays, MRIs and CT scans

No need for detail and explanation in the topic sentence.

Topic sentence should be short brief and to the point. Only introduce the argument

radiologist in detecting abnormalities and diagnosing conditions like cancer, fractures and internal bleeding. companies like Aidoc and Zebra medical vision developed AI solutions for this purpose. AI can analyze vast amount of biological

Scanned with CamScanner

How is it benefitting society as a whole??
What positive outcomes have been seen.

data it can identify potential drug candidates and predict their effectiveness. This accelerate the drug discovery process and lead to the development of treatment for various diseases.

Concluding sentence?

AI algorithms analyze patient data, including genetic information, medical history and lifestyle factors, to generate personalized treatment plans. This approach is known as precision medicine. Wearable devices equipped with AI technology can continuously monitor vital signals and signs, detect abnormalities and predict health issues before they occure. For example. AI powered powered wearable ECG monitors.

How does that relate to the topic

Redundant expression

AI- driven virtual assistance can provide patient with personalized health advice, answer medical questions, schedull appointments and remined them to take medications.

These are separate arguments None have been linked to the topic. How does these feature you discuss benefit society. Give an example of that. Provide logic and reasoning for

AI algorithms analyze a vast amount of medical literature and research data to identify patterns discover new insights and accelerate scientific discoveries. This aids researchers in understanding deseases, developing treatments and advancing medical knowledge.

No paragraph structure. No point in argumentation No validation and no evidence

A paragraph should at least be 5 sentences long. This does not constitute as a paragraph

Scanned with CamScanner

AI Algorithm make easyness in office work like data entry works. Huge amount of data to be entered in computer manually which is burden for a human being. He set for hours, days to enter that data into computers By the introduction of AI to modern computers it made it easy to add a big amount of data in computer automatically within minutes. AI in computers can analyze, interpret and give result of big data in seconds. it also helps researchers to evaluate data easily. for example: spss software it can manipulate data and can construct statistical tables for mean, median and mode. it can also apply indepent samples T-test to a big amount of data of a research work having no or less chances of error. Despite human brain we believe more on digital devices.

In the field of science and technology AI bring a big revolution it changed the way of communication with the help of AI peoples could see eachother on smartphones. They can talk.

ease
not a word
sentence structure
Incoherent and irrelevant
word choice
No relevance to the topic. Does not highlight how AI is promoting social good.
write in 3rd person
Completely out of context
According to outline you have 3 paragraphs on AI easing office work. You have written only one.
irrelevant. This is not a social good.

Scanned with CamScanner

laugh and share their moment with eachother. Different satellite are being prepared and sent to space to collect data from the space, moon and weather conditions. The spacestation communicate directly with earth making the study of outerspace easy from earth. scientist can evaluate data from their comfort zone.

AI changed the face of smartphone industry. It gives more power to smartphone. From a small smartphone we can control everything. we can edit, share, change, interpret photos and videos. Even we can create photos, videos and audios by just speaking to our smartphones. many different types of applications are made with AI algorithm power which make our work easy. AI is now reached to every corner of the world. AI Revolutionized the fifth Generation computers. many audios and videos and even voices of famous personalities are made through deep fake artificial intelligence. many virtual talsas are sponsored through artificial Intelligence. For example Imran khan address when he was in

Incoherent only discuss one idea in one paragraph

sentence lacks cohesion

That is a benefit to scientists, how is that a social good?

vague

We can even whould be the correct structure

Irrelevant to the topic

Again the discussion is about personal or individual benefit while the topic is about social good

Scanned with CamScanner

page : 9

Jail addressed the virtual talia of PTI through artificial Intelligence. Artificial Intelligence could process million of megabytes of data in certain seconds and minute. AI can create image of different thing according to the interest of humans. Approximately All smartphones and computers use Artificial intelligence Algorithm and peoples are using them happily. Many different softwares like chatbot, chat gpt, meta AI etc are made through Artificial intelligence which gathers informations of your interest when you are using those applications.. For example : Tiktok, Facebook and instagram will automatically recommend videos to you based on your and interest and your watch history. When once you watch a full video or give a like to a video AI Algorithm will then search throughout the application and will gather more videos like you watched before or you interested to watch. through different chatbots we can collect specific and to the point data for research and educational purposes

Irrelevant to the topic
No structure

No consistency in paragraphs
All paragraphs should be approximately equal.

Scanned with CamScanner

simply just by typing or saying a few words. There is a big AI algorithm runs behind.

AI made it easy for print and press media to collect data about a specific area and digitalize. Their news channel they made their own application softwares with the help of which All the informations in the world is just one click away from the peoples.

AI algorithm has great impact on the educational system. AI bring a great revolution in the education system. AI Algorithm powered educational tools like microsoft office endNote, one note and research based softwares where a lot of data is entered and result is just one click away. Many different type of tests are applied to samples, researches papers and the result is shown in 2-5 minutes.

AI changed the dynamics of education system by providing various tools, management softwares. It is impossible for humans and this is made possible only through AI Algorithms. We

Irrelevant to the topic
No structure

can prepare ppt's, Assignments, Artwork music and many more with artificial intelligence. Big amount of data can be entered to spreadsheets making charts, percenteges easily & with the help of artificial intelligence.

repetitive

AI Algorithm changed the dynamics of vehicle industry. modern vehicle are powered with artificial intelligence, making it possible to drive the vehicle without a driver like Tesla autopilot mode in tesla cars. Through AI Algorithm modern vehicles can sense if disaster in front of the vehicle it can sense other vehicles, humans and other things in front of cars avoiding the chances of accident and reducing the accident chances for the vehicles and humans. many companies are introduced with robots which make work easy for the employees like motorcars are manufactured by robots. many other human like robots are also introduced in the work. for example ASIMO by Honda, pepper by softbank Robotics, ATLAS by Boston dynamics etc

Only this portion is relevant
Give it a shape of proper paragraph

Scanned with CamScanner

Create clear distinction between paragraphs
Leave a blank line and an inch space at the beginning of paragraph

Artificial intelligence made the world a global village where everything is just one click away and can access very easily and freely from the comfort zone of every individual with the help of a smartphone and internet. many business are standing run around the globe with the help of AI. ajust like amazon, Alibaba, shopify and many more. Through the AI economy of the top of IT developed countri-es got boosted. Artificial intelligence generate more opportunities for talented peoples. Informations from one end of the word is reached to other end of the world in milli seconds with the help of AI.

Directly address the argument in the topic sentence

AI powered cameras and drones are used to monitors wildlife populations, track animal movements, and detect poaching activities. AI algorithm process satellite imagery, sensor data, and other environmental data sets to monitor change in ecosystem such as deforestation, habitat loss, and biodiver-sity decline. This informations enables,

Scanned with CamScanner

Conservation organizations to assess environmental threats, prioritize conservation efforts and develop effective conservation strategies.

AI technology including remote sensing, drones and machine learning algorithms, optimize agricultural practices to minimize resource usage, reduce environmental impact and increase crop yield. AI system process real time data from various sources, inn including social media, satellite imagery, and sensor networks to assess the extent of natural disasters such as hurricanes, wildfires, and earthquakes.

AI Algorithms analyze data on water quality, availability and usage patterns to optimize water resource management strategies, including drought monitoring, groundwater recharge, and pollution control. By predicting water supply and demand dynamics, AI system supports sustainable water management practices.

From the introduction of Artificial intelligence it helps humans in every field of work. it made easyness in solving complicated problems in short interval of time. Artificial intelligence algorithm provide benefit

Incoherent
No structure to paragraph
No proper argumentation.

No such paragraph in the outline
