

A stone thrown by a Palestinian worths more than Entire Arab Arsenal

Outline:

1. Introduction:

A stone thrown by a Palestinian is worth more than the entire Arab Arsenal because, without having any logistical support for Arab countries, Palestinian are fighting. This represents their courage, will to fight and practicality of their fighting. Entire Arab Arsenal are silent because of their own interests like USA wants to eliminate Hamas and to get the oil prices high.

2. How the Stone Thrown by a Palestinian Worths More than Entire Arab Arsenal:

2.1 A stone represents their fight till end

2.2 A stone uncovered the Israel that civilians are being used as shield

- 2.3 A stone represents their practical struggle rather than verbal tactics of Arab world
- 2.4 A stone showcases that Arab World is not helping militarily and humanitarian assistance
- 2.5 A stone thrown by a leader brought the morale of Palestinians to fight
- 2.6 A stone shows their courage and struggle for a cause
- 2.7 A stone shows they have nothing to fight but they are still fighting

3. Why the Entire Arab Arsenal has worth less than a stone by a Palestinian:

- 3.1 Arab countries like Kingdom of Saudi Arabia have their own interests like eliminating Hamas
- 3.2 Iran wants to destabilize normal relations with between Israel and USA
- 3.3 Turkey is maintaining its hegemony as a sole negotiator

Day: **MTWTFSS**

Date: / /20

3.4 Jordan wants to build support deal with USA

3.5 UAE do not want to halt its economy on realigning the interests of western nations.

Conclusion:

If the Arab world take the practical steps to build peace in Palestine then Arab world would have more worth than a stone.

Palestinians are fighting by every means, against Israeli genocide. Even though they are in a short supply of arms and humanitarian aid, they are still fighting with the courage and bravery. Even a little struggle of Palestinians is worth more than the entire Arab world. Arab world are not helping the Palestinians to fight for their cause because they have their own interests. The Arab countries are only taking verbal announcements and not any practical step taken by them for Palestinians. Like Saudi Arabia wants to eliminate Hamas and to get the prices of oil skyrocketing. In addition to this, Iran wants to pursue its nuclear program, and Turkey wants to maintain its hegemony in diplomacy owing to these interests Arab world is not offering any arsenal to fight. They, even, are not providing enough humanitarian assistance owing to the above situation.

Palestinians have nothing to fight - but a stone. They are confronting Israeli's through every back and creek. That's why the stone thrown by a Palestinian worth more than the entire Arab Arsenal.

A stone thrown by a Palestinian worth more than the entire Arab Arsenal because a stone represents their fight till end. Even if they wouldn't have a stone left behind, then they will also fight. In addition to this, Hamas fighters, even every Palestinian is born to fight for their cause. Children are being taught the lesson of sacrifice for their cause. This situation is manifested by the Palestinian child who were born during Nakba in 1987 are now sacrificing their lives. The words uttered by Yehya Sinwar was:

"It is better to die with F-16 fighter jet than Covid-19."

These courageous words are being practiced by every Palestinian. Further, the death of Ahmed Yassin in 2004 was a sign of the bravery that they will achieve their cause at every cost.

A stone thrown by a Palestinian uncovered the reality that civilians are being used as shields. Israel is waging its war in northern Gaza killing 42000 Palestinians including 16000 children. Israel is defending this act by saying that Hamas leaders are using civilians as shields. The death of one of the leaders of Hamas in Gaza revealed this notion. Rather every Palestinian including their leaders are fighting for their cause. Moreover, this step taken by Israel unfolds its intentions in front of the world that Israel do not want to be ended. This rose the anger of people around the world.

to support for the Palestine
but the Arab ~~disregard~~ all
still silent. Only for this rea-
son Israel is carrying out ma-
ssacres in Gaza.

A stone thrown by the
Palestinian youths more because
it represents their practical
struggle rather than the ver-
bal condemnation of entire Arab
World. Saudi Arabia, UAE, Jor-
dan and other Arab countries
are only criticizing the Israel
and the western world to stop
genocide. However, the western
world is not paying a heed to
these words. Owing to the negli-
gence in providing the arsenal
to Palestine, Palestinians are
fighting for their own. Unlike
of the Arab world tactics, Pa-
lestinians are taking practical
steps in fighting.

As it has been rightly said
by a journalist:

The courage of which
a stone has been th-
rown, possess the cap

ability to destroy whole
Israel.

Furthermore, since first intifada,
Palestinians are fighting on
the grounds and are facing
the brutalities of illegal settlers.
The attack of October 7, is
a recent manifestation of
the fight for their cause.

A store has also worked
more because Arab World is
not helping militarily and with
humanitarian assistance. Egypt,
owing to the restrictions of Israel
is not opening its borders to
pass aid to Palestine.

According to UNRWA:

1 in 8 children in
Gaza are dying beca.
use of hunger.

In addition to Egypt, Turkey
is only providing assistance
in diplomatic providing only a
minute quantity of food.
Furthermore, Saudi Arabia is

not providing any military support. Crying to the keepers of the Aids World, a stone thrown by a Palestinian worths more than the entire Arab Arsenal.

A stone worths more than the entire Arab arsenal because it brought morale of the Palestinian up. In case of absence of any military equipment, a struggle of a stone worths it. By looking such a courageous act of a Hamas leader, every Palestinian is ready to fight till end. The same was uttered by former military General of Israel:

"We have to stop the war because we cannot eliminate ideology of Hamas"

This is evident in the death of small Hanin and then in the death of Yahya Sinwar. The ideology is

strengthening the cause of
Palestinians to fight for their
cause.

A stone is more impor-
tant than entire Arab ~~na-~~
sional because it represents
the courage and struggle of
Palestinians. Since 1947, Pales-
tinians have experienced many
wars. Ranging from first
Nakba in 1947 to the 1967
war. Palestinians have remained
steadfast. Also the 1987 war,
2006, 2012, 2014 and then in
2023, Palestinians have endured
every difficulty. Now, in 2023,
even if they have left with
no weapons, they are fighting
with everything they have.
Therefore, according to a jour-
nalist:

Palestinians' resistance
is the resistance of
blood, courage and
bravery not the
artillery.

So, a stone represents the courage of Palestinians to achieve their rights.

A stone has more significance because it manifests that Palestinians have nothing to fight but they are still fighting. Palestinians are deprived of water, fuel and energy. According to Israeli Defense Minister:

"We have blocked the water, fuel and energy to the animals (Palestinians)."

The above saying represents the brutality of Israel. In addition to this more than 60% of the infrastructure of Gaza have been destroyed. Furthermore, 65% of the agricultural land have become barren representing the shortage of food in Gaza. The loss of all the belongings like food, fuel and energy cannot deprive the Palestinians

of their bravery to fight. A stone thrown by a Hamas leader is worth more because it shows that they are still fighting.

The arsenal of entire Arab sword worth less than a stone because Arab countries are prioritizing their own interests rather than Palestinians. Take an example of Kingdom of Saudi Arabia. Saudi officials are not taking practical steps instead of verbal condemnation. Saudi Arabia is prioritizing its own interests. Like killing of Hamas officials. Saudi Arabia considers Hamas as a threat to its sovereignty. In addition to this, Saudi Arabia wants to normalize relations with Israel to promote India - Middle East Europe Economic Corridor. Further more, during the war the oil prices are high, which is a direct benefit to the Saudi's economy. Owing to

the above discussed reasons Saudi Arabia is not providing any arsenal to Palestine, rendering it worthless.

Iran has also interests in prolonging the war. That's why it is playing tactics and not entering into full-fledge war - directly Iran wants to destabilize the relations between Saudi Arabia and Israel. In addition to this, Iran wants to pursue its nuclear proliferation programme further. In this regard, it wants the western world to forget its targets. Furthermore, Iran wants to portray himself as the sole player in this conflict earning a huge respect from the Muslim world. The above interests of Iran, has stopped him so directly come in ground to fight for the cause of Palestinians.

Turkey wants to maintain its hegemony as a sole negotiator in the conflict. Since

the start of war, Turkey is also only passing sweeping statements because of its interests. Turkey is a NATO member and formally requested the joining of European Union. USA and European have strong presence in both the alliances - That's why Turkey is not providing any arsenal to Palestine. In addition to this, President Erdogan has earned a significant vote bank by doing diplomacy on conflict. These interests have restrained Arab countries to help militarily the Palestinians.

Jordan has also wanted to secure its interests by building ties with USA. Jordan's economy is struggling with balance of payment crisis and low purchasing power. Furthermore, it has formally shown its interest to join European Union. In addition to this, electricity shortages are pending him to bow in front of USA.

and the western countries. Moreover, during the recent visit of USA foreign secretary Anthony Blinken, Jordan has again announced only verbal condemnation. Owing to the above reasons Jordan is not providing any essential support to Palestinians rendering them helpless.

United Arab Emirates being a hub of western tourists, do not want to indulge in war. According to World Tourism Organization:

"Around 1.3 million western tourists arrive in UAE every year."

The economy of UAE is mainly based on the revenue collected from the tourists. In addition to this, it has expelled the public activists who raised their voices in favour of Palestine. Therefore, UAE is not providing any essential rendering it worthless for Palestinians.

To conclude, Arab World Arsenal is worthless because it could not help Palestinians to achieve and fight for their rights. A stone is more important because it represents their fight till end, a stone also unveiled the malign intentions of Israel. In addition to this a stone represents the political struggle of Palestinians and the helplessness of the Arab World. Arab countries are not providing enough support, instead of having strong military, are termed as worthless. Arab countries are not taking practical steps because of their interests in the realm of economy, foreign policy, tourism and national interests. Letting aside these interests, Arab World Arsenal can prove effective in place of a stone.
