Does Poor Performance in sports indicate the decline of a Nation?

Introduction:-

- 1) Hook.
- 2) General Statement
- 3) Thesis Statement

Main Body:-

1) Global Recognition :-

- Image towards the world.
- Rank of Pakistan
- Gender discrimination issues and giving more importance to Men.

2) Waste of Talent :-

- Ignorance of Government
- Biasness of PCB and other Boards.
- Less Talent Shows

3) Audience :-

- Global position
- Interest of people
- Waste of money

Introduction:-

Hockey is the national sport of Pakistan, we all know that but in recent years does it fulfill the position that is given to it? The question that arises, is catching the attention of the people around the nation, that poor or good performance in sports is affecting the nation or not? There are many reasons that show that it might be true. Poor performance in sports create a lot of issues like global recognition of the nation. It affects the audience, their interests etc. and the most significant part is waste of talent that will lead to the fall of nation rank on the globe. By solving all these issues the world will recognize the global position of one's nation. The economy of the nation will rise because it will catch the eyes of other nations and they will visit the country. Many possibilities and opportunities will arise. The performance in sports affect the position of one nation.

Arshad Nadeem, global sensation and athlete who participated in Olympics that was held in France. He won the gold medal by winning the Judo contest, that was a global recognition for Pakistan, now everyone who watched the Olympics knows who Arshad Nadeem is. That's why sports are essential for one nation, but unfortunately there are less athletes who are known by the world due to uneven opportunities and less focus on the sports on lower level. Arshad was the citizen of a village but he knew what he wanted to do and he made a spot on everyone's mind. This shows that a nation is recognized by its people, if they fall, the nation will automatically fall. The rank of Pakistan on the list of sports is very low. Less number of people participate in Olympics and football championships because the government doesn't bother to invest. If they do, the position of Pakistan will flourish. Another problem that arises is gender discrimination. The main focus, the focal point is the sports of men. If we take the example of cricket, people know every single player of the team but what about the women team? People pay a lot of attention

to cricket that is played by men. They know every single person, their social life, private life etc. If government and the citizen of Pakistan give appreciation to the women team, they will play with full enthusiasm and they will grow and play globally, as same as the case with other sports too. These drawbacks of lacking importance of sports lead to the decline of Nation.

Pakistan is full of emerging talent and confident & courageous people. They want to show their talent but the hurdle is there are no platforms to execute their talent, to show what they are made of. And the opportunities given to them are less in number. Only people who belong to, or part of higher authorities are on front line. The people who have less resources accept the defeat that they can't fulfill their dreams and this shows the negligence of the government. If they start opening doors for every type of people ignoring the fact of class, race, identity, cast, money etc. The nation will grow to a point that Pakistan will be recognized as the nation full of sportmanship. There are boards for every type of sports like for cricket there is PCB (Pakistan Cricket Board)

And for hockey, football, squash, golf etc, there are other boards. There is business seen in every board. They only give attention to those who have strong background, but if they start appointing the talent based people, the team of every type of sport will become stronger day by day. A great initiative was taken by starting a series of cricket known as PSL (Pakistan Super League) where different players of different cricket teams were selected to play in PSL. This series was full of creativity, talent, harmony, love and by doing this the world knows that Pakistan can do better day by day.

Another fact that lowers the position of sports in a nation is less talent. Shows people want to show what they have on bigger platforms but they don't get the opportunities and talent is wasted and they just start focusing on how to make money to fix their house. This shows that their real life and dream life clashes with each other and the major part of destroying the dreams of youth is the government that runs the nation and becomes the major factor of falling of a nation.

How a nation is built? A nation is built by the people, whom we collectively call a nation. Nation depends on the people. How they work together, how they agree upon one thing, etc. This shows the connectedness of a nation. But when it comes to the topic of sports, we lack that connection. For example, it depends on the interest of people. When someone is selected by the audience to participate in any type of sports, there is always some critics who critique about the weaknesses of other person. Which create hatred among the audience and they fight with each other. Now, if we look at the opposite side of the picture, if they start supporting that person, none of this will happen. This shows that boosting the sportmanship of any person and creating him/her recognized by everyone is a win-win. Now, another point rises that is the interest of the people. Audience want to see more of sports in Pakistan, they want more energetic matches etc but they don't see any of them on T.V, Radio or Live. That's make them loose interest in sport because they are not getting what they want. And they feel like it's a waste of money.

and time. Making sports interesting should be the primary goal of a nation and this will help that nation grow effortlessly. Not only it applies on Pakistan but for other nations too because they all have different needs, and they want to be recognized by the world and by making sports a global key of success, a nation will never fall or loses its position it will create harmony among nation and all the issues like global position, recognition and mainly the fall of nation will be solved in no time. So, decline of nation depends on the poor or good performance in sports.
