

Essay Topic Exam 03

Name: Muhammad Khan

Batch No: Batch = 70

Government surveillance - Good or Bad?

Out line

A Introduction

a: Hook

b: supporting sentence

c: Thesis statement.

Main Body

Government surveillance - Good
or Bad?

B Cyber security and Human trafficking

a: illegal money transfers.

b: social media

c: Human trafficking

C Maintaining Peace

a: law and order situation

b: Terrorism control

c: security of citizens

D ~~Injustice~~ end - injustice

a: miss use of power.

b: End - corruption

c: Child marriage.

E Better / soft image

a: Explore trade.

d: expend economy

c: Trust

F Control Pandemic Disease

a: COVID

b: Polio

c: Apatitus.

G Eto Education Improvement

a: Better education

b: illiteracy rate decrease

c: control toucebring female students.

CONCLUSION

Introduction :

Government ^{as} corporate and surveillance are not separate they are an alliance or "trust", Bruce Schneier closely and carefully watching and monitoring someone by organization or Government is surveillance. Surveillance is done on every level Global, regional and government. On Global level some organization like ~~the~~ United Nations, World Trade Organization, World Bank and International Monetary Fund do surveillance issues related to their domain, like security issues monitor by Security Council or UN, Economic related cases monitor by WTO, WB and IMF, Regional level organization like European Union (EU), African Union (AU) etc work and surveillance on their domain. On government level surveillance done by multiple institute or departments. Like Pakistan multiple organization cover multiple domains. FIA, IB Health, Education, Agriculture

etc work in their boundary line. Surveillance of Government is beneficial to monitor cyber security and human trafficking maintaining peace, end-injustice, show soft image, control pandemic diseases and Education improvement.

Cyber security and Human trafficking come first in Government Surveillance. Their are multiple Fake account transfer money illegal related to terrorism, and leading misinformation groups which harm the state. Beside this illegal money transfer to avoid taxation like case of Panama leaks. For example: Kulbhushan Jadhav who aid illegal to Baloch Liberation Army to fight or as Proxy. To avoid activities above mention monitoring are necessary, secondly protection of social media to remove misinformation and wrong leaked video, these cases are rapidly increasing. Misinformation and leaked video hurt the life of concern person

The CNN editor/writer ⁶⁶ Emiko Jozuka" article on May 18-2020 "The two Pakistani women murdered" is so-called honor killing after leaked video circulate online. To avoid these type of incident social media monitoring and deleting videos can do to save lives. Thirdly Human trafficking need serious surveillance, Boys and girls are kidnap, sold, bought and rented for labour force and sexual activities. US State department trafficking in person 2009 report, that Pakistan as a source transit and destination for men, women and children trafficked for purpose of forced marriage and sexual exploitation. According to IFA, 6767 illegal Pakistani migrant had entered Europe in 2017, and recently several media reports Pakistan girl were lured into contract marriage. To control such situation for surveillance on government level made prevention or

Smuggling or migrant act 2018.

In the same line in surveillance or Government come's Peace maintaining. For Peace law and order situation is main to maintain. Punishing the guilty and releasing the innocent is law and order. Monitoring untown activity in cities and specially in boarder areas implementing strict law for culprits to control illegal activity example Kulbushan Jadhav who involve in terrorism activity. To impliment law and order monitoring or these type culprits is compulsory.

Secondly terrorism need surveillance mostly in Balochistan and KPK. Recently attack 09-11-2024 in Quetta railway station in which 30 plus killed and 60 plus injured, Attack on police line Bannue on Oct-15-2024 martyred a corp, January -30-2023 Suicide attack in Peshwar killed 59 person and attack on Chinese in Karachi on Oct-06-2024 Two Chinese killed

and to injured. multiple terrorist attack take place. to maintain peace surveillance on national level required against terrorist activity are obligatory. Thirdly security of citizen need surveillance. property safety, life safety, Business safety and Freedom need check and monitoring. of activity harm and danger to them. For instance the Step in Quetta city, all the city are now under coverage of security camera which control through IS office Balochistan. From this office all the activity of Quetta city is record at single time for purpose to make safe from harm and danger to life and property of people. all the discuss point pay the way to government to surveillance.

Further more in surveillance of government come's injustice to control miss use of power need continuously check. the society have divided into

classes - upper, middle and lower. mostly upper class use power against lower. such as case of Multan mahi in remote part of Punjab, and other example is Fogg motorway, due to Fogg motorway is closed for traffic to avoid incident, an anti terrorist court judge was stop by corp, the judge cross the barrier with squad not only violate law but also threaten the corps. To end these miss use of power need monitor of power, secondly correction create injestive environment, most of Government offices are engaging engage in correction, like police, wapda, AIG office etc for some amount police do injustice favoured who give him money as corruption, in AIG office a retired employe can not take pension without giving money (corruption). These cases need Government surveillance transparency organization.

child marriage is extremely
injustice, Pakistan is full
of example of child marriage.
it is serious violation of
women right. According to
UNFPA report Between 2012-
2013 in 12 month's the
marriage of young girl age
15-19 were 24.3%. Teen girls
are also more likely to die
from complication during
child birth. According to
2016 analysis 10% girls
between age of 15-19 die
from pregnancy, child marriage
far away girls from right,
to safe health, freedom,
and putting their lives in
risk. These all injustice
require surveillance to end
justice.
