

Saima Khan (Brain Drain)

1/ Introduction:-

1.1 = Hook

1.2 = General statement

1.3 = Thesis statement.

2/ Causes of brain drain:-

2.1 = Social political instability

2.2 = Decreased research productivity

2.3 = poor healthcare infrastructures

2.4 = Low jobs opportunities

2.5 = Low standards universities

2.6 = Lack of advanced Technologies

2.7 = poor living conditions

2.8 = Economic instabilities

↳ Low salaries

↳ loss of tax revenue

↳ loss confidence

2.9 = High inflation rate.

2.10 = Devalued local currency.

3/ Consequences of brain drain:-

3.1 = Loss of human talent

3.2 = Loss of potential future entrepreneurs

3.3 = Lack of skilled workers

3.4 = Effect country growth and developments.

3.5 = Loss of innovative ideas

3.6 = Poor health education

3.7 = Low growth social unrest.

4/ Conclusion:-

Introduction:-

Human capital plays a crucial role in a country's peace, prosperity, and stability. It not only attracts foreign direct investment but also helps a country to maintain its competitiveness in the ~~glab~~ global markets. However, the issue of brain drain has caused many countries, including Pakistan, to lose the precious asset of the skilled labour force and suffer for prosperity and stability. A report by the Pakistan Institute of Economics beautifully supports the given argument that around 23 percent of Pakistan's highly skilled professionals have migrated abroad. Because the country fails to provide sufficient employment opportunities to its native professionals, which in turn leads them to go elsewhere for their bread and butter life. "Brain drain is a serious problem for developing countries because they lose their best and brightest minds, who can contribute to their economic and social development" Said by Ben Ki-moon.
