Q&N02

In 1949, communist party started protest in China against republic of china party.

These protest led to civil war and Republican party move to taiwan and make it an independent republic of china state.

This party gain support from USA - and China come under Mao zedong administration.

Mao zedong Government was basically communism party and claim that Taiwan is part of china.

Taiwan is conflict of china after in 1945 when it is hand over by Japan.

So, Republic of china is free economy market and capitalist party - and US has major ties with them in their diplomacy as well as Military.

And China, also wants that US restrain from Taiwan - They offer (China) to Taiwan a special scheme that china only control foreign policy currency of Taiwan, remaining matter carried by Taiwan itself - But Taiwan reject this offer.

In past, when US wanted to take control of Taiwan industries then china landed its army in front of Taiwan to just show Taiwan that stay away from USA.

USA has keen interest in Taiwan industries

More than 12 trillion dollars of world economy is directly dependent on chip. All the world defence (project) products with jet fighters with missiles and war ships etc are dependent on semiconductors.

The world transport - cannot run without the tiny chips.

Taiwan has that chip industry which is 3 Trillion of world economy - Beijing having claim that Taiwan is china part and also wanted to control the chip industry.

If this happen US will lose not only in chip industry but also in world control weapon. So, US wanted to china away from Taiwan.

That's why US provided Military & diplomatic Support to Taiwan.
