b. Strict rules and regulations

c. making good policies

d. Attention towards economic development

e. Utilization of Resources

vii. Conclusion

we, in Pakistan are breathing in a culture which, for no better description can be called as the culture of economic imperialism. It has permeated to every facet of our life. Not a single institution is without its black sheep whose number is ever on the increase. As a matter of fact of fact, we seem to be immune towards economic imperialism. Indulgence in economic imperialism is not considered, as shameful act. Rather a person who does not avail this opportunity considered to be foolish. It also leads to exploitation, that ever increased on number and also destroy the rules and regulations. Certain actions are

taken to mitigate this problem.

Economic imperialism is a matter of fact that, in which one political party, community amass wealth, in terms of number more than others, or all political parties.

Economic imperialism is a power that having more than all others. Economic imperialism, must be taken in terms of education, resources, exploitation, nepotism, red-tapism and distribution of resources that defined it. Political parties await this opportunity on behalf of forces only. Forces rushed the political parties that are not in more powers and evenly on the condition of political chaos. Must mitigate this type of problem.

Yes it's true that economic imperialism is fiction. In our country Pakistan, these problems are from its inception. Any political party that wanted to be in power it's compulsory to rush another political party whose seems to be in front of them. They can do this on their own, or with the help of others.

Economic imperialism is a fiction specially, in Pakistan it seems in terms of education in which poor are treated harshly manner and rich are good way. Educational institutions that are international established only in those areas where poor can not reached so, poor who want to get international

education, go to abroad.

Economic imperialism is fiction in specially, Pakistan because during war such as Afghan war against Russia there was a problem for Pakistan to settlement and rehabilitation of Afghan refugees. A Huge aid was announced for them but this aid was only in the hand of strong political parties member. A huge crisis of economy was appeared but wealth was only in the hand of high officials and political member. For the settlement of them political parties reached on the shore of chaos. Economic imperialism deprived and reduced the economy in the country that seems to be fiction.

In contrast of above environmental policies are introduced and managed so, deeply that applicable only for lower. It leads to nepotism and favouritism someone and others left behind. Environmental policies eradicated on the way of progress and wealth is only in the hand of high public officials. Environmental policies must be redefined on the index of global level environmental policies are also introduced such as pollution decreased policies, disastrous management, urban management and many more only for the lowest countries, not for the developed countries. So, must be mitigate this problem in all over the world.

Poverty is the major dilemma in Pakistan and also over the world. Pakistan having number of well-powered authorities, communities, and political parties and its also have too-much the poor communities such as minorities. Poverty circulated among poor people and wealth among high authoritarian. It includes that when economic distribution time came high authorities prevail the money, and do not distribute between the so, in order of economic imperialism it is only fiction not a fact. In order to mitigate this problem, we must apply certain actions which mitigate them.

Salary in all the institutions such as UNAPDA, Bureaucracy, NADRA, Education, judicial and all others is a law. Anyone who has low salary must want to prevail the economy and show himself as a well-powered in front of all. Low salaries lead to utilization of debt. So, anyone who want to escape from debt, indulge in corruption and the concept of economic imperialism destroyed. Salaries are also linked with political parties, budget, and high official authoritarian. Budget in terms of pole, infrastructure and many others. Budget also in the hands of high authority member to engage in corruption.

Economic imperialism
seem myth in Pakistan because
of no rules, laws, and regul-
ations. Anyone who want
to economically strong no,
care about rules and
regulations. Rules and regulations
are flaws in Pakistan. Prevail
economy leads to prevail economy.
No strict laws applied on
them. Economic imperialism is
far more dangerous than
nukes. Economically shortage
things leads to brain
drain specially in like
Pakistan. Anyone opt this engage
in this annex. Economic resour-
ces are available for all
but in order to use these
there must be rules and
regulations. In order to eradicate
these must be strict laws.

Economic imperialism leads to fail choose the righteous political leader. Anyone having low in wealth do not stand in front of wealthiest parties. Those parties having equal rights and opportunities are able to leads others but in case of low economic wealth it will be deceived. Economic imperialism is not come in right way due to political parties. They hidden the political rights of others leads to damage the political system as whole. Population in Pakistan is ever on the number of increase that demands the right person or leader that leads them.

Economic development will slow increase of the economic prevailing. Economic development - seem devastatingly way and in favour of high ranked people that are exploited them harshly way. Economically Pakistan is not a weak country but authorities, political leaders and, high ranked officials are nexus on economy and not want to regulate between others. So, there is major dilemma in Pakistan that economy collector institutions such as FBR and others are collecting economy but not right manner. There is lack of staff and corruption is also involved. In order to tackle this problem IT system must be launched.

Exploitation leads to utilization of more resources so, resources will be end over period of time. Exploitation not means that having nothing to eat but it also means that having no, wealth, no water, food scarcity, no cloth, no urban management and many more. Exploitation leads to wealth prevailing in order to fulfill the necessities of life and home cabin trench. Anyone who does not avail this opportunity considered to be fool. So, in order to eradicate these problems ones must be sure to remove the exploitation and must certain actions are taken to mitigate these problems.

There is no accountability when the economic imperialism taken in the hand of well-reputed authorities and politicians. politicians who are in more power do not care about any problems and not be held the accountable because they will know about the rules and laws.

Rules and regulations are seem flaws in front of economic imperialism. In order to accomplish the rules and regulations there must be applied some strategies on all. All are must be accountable and follow the laws, rules and regulations.

Corruption is a major problem in economic development. All are indulge in prevailing corruption.

As a matter of fact of fact it seems immunity towards corruption that ultimately leads to economic imperialism. So, in order to tackle this problem, there must be strict rules, laws and regulations and accountable.

It is concluded that economic imperialism is a fiction not a fact. There must be applied some strategies in order to gain the wish of economic imperialism.

Economic imperialism must be filtered in terms of corruption, resource, and distribution of wealth.
