

Q2:

PrecisePeaceful World Is Never Impossible

Significance of peace is acknowledged in the nuclear age where great nuclear forces refrain from surrendering. The nuclear deterrence is achieved by spending billions of dollars and <sup>total</sup> war across the world is of no benefit. Nowadays, nuclear armaments have power of great destruction, ten times higher as compared to those used in second world war, not only regionally but its effects can spread through wind, water and soil to those who are yet unborn. These nukes can only destroy and never create. The idea of world peace, lawfulness and disarmament considered as impossible, is only human-made and peace has never been impossible. For the sake of peaceful world, leaders of the nation must be harmonious and one must rethink of one's own attitude as an individual and nation as well. When every individual brings peace in himself it will loom possibilities of harmony and reconciliation in the world.

Q3:

(i)

Ans.

Drought is an extreme period of weather when there are no rain spells for weeks even months, when rivers, streams and lands dried up, crops damaged due to harsh conditions, cattles died from thirst,

Q3: (i)

Ans.

Drought is an extreme period of weather when there are no rain spells for weeks and even for months. It is such harsh period of the year when temperature of the region rises due to lack of rains. Living organisms including human beings face harsh consequences such as rivers, streams and lands are dried up, crops are damaged, and cattles are died from thirst.

(ii)

Ans.

The writer tells a popular saying and expect everyone to know that, "A red sky at night is the shepherd's delight, A red sky in the morning is the shepherd's warning". But the writer doesn't endorse the popular saying about the red sky because he acknowledges it to be right very often that can't be trusted. The author further explains that if sayings like those of red sky were right then there these would be no need of weather forecast.

(iii)

Ans. Yes, weather forecasting is a science that predicts weather most accurately and it is called meteorology.

(iv)

Ans. Weather forecasting is a method to predict the possibilities of weather for next several days. It has always been very difficult to predict from ancient times because there are several factors affecting it. To be able to predict the weather, one must understand and carefully study several factors. To forecast accurate weather is far more difficult task. In ancient times, people used to look for tell-tale signs in the sky or watch flights of birds or observe the ways smoke rose from a fire due to lack of instruments they never predicted accurately. It has become somehow, easier nowadays but still accurate prediction is very difficult.

(v)

Ans. In ancient times several things were used to predict and forecast the weather. One of these things was moon, people thought that it is the moon that controlled weather, it had a lot of water, especially when a crescent-shaped moon appears, people thought that now it lays on its back and rain is on its way. In this way, they used moon in forecasting weather.
