

OVERPOPULATION: A RISING MONSTER

Brain Storming

Outlines

1. INTRODUCTION:-

- 1.1 Hook
- 1.2 General Statement
- 1.3 Thesis Statement

2. Causes of Overpopulation:

- 2.1 Falling Mortality Rate
 - 2.1.1 Imbalance Between Births and Deaths

2.1.2 Medical and Technological Advancement

2.2 High Fertility Rate

2.2.1 Religious Characteristics

2.2.2 Social and Cultural Features

2.3 Lack of Women Education

2.3.1 Early Marriages

2.3.2 Lack of Family Planning

2.3.3 Lack of Women Empowerment

3. Consequences of Over Population

3.1 Food Insecurity

3.1.1 More Production

3.1.2 Failure to Unequal Distribution

3.1.3 More Resource Intensive Foods

3.2 Environmental Damage

3.2.1 Green House Gases Emission

3.2.2 Loss of Biodiversity

3.2.3 Water and Soil Pollution

3.3 Climate Change

3.3.1 Deforestation

3.3.2 Global Warming

3.3.3 Increase Natural Disasters.

3.4 Poverty

3.4.1 Unemployment

3.4.2 Lack of Quality Education

3.4.3 Lack of Health Facilities and Infrastructure

3.5 Increased Conflicts

3.5.1 Over Land

3.5.2 Over Fresh Water

3.5.3 Over Energy Resources

4. Conclusion

1. INTRODUCTION:-

"Futurists don't consider overpopulation one of the issues of the future. They consider it the issue of the future," said Dan Brown. Overpopulation is neither a new issue nor is it a fully settled one. Developed countries are dealing with it successfully, whereas, developing countries are still struggling. Unfortunately, Pakistan is one of them. Overpopulation is the mother of all issues. As people on the world increases, it increases the human activities which results in ozone layer depletion, deforestation, green house gasses, global warming, Moreover, it leads towards the social evils like threat to democracy and terrorism. It, also increases the competition over the land, water and energy resources. As we add more and more people into the world, the value of life not only declines, but also it disappears. Then it doesn't matter if someone dies. The main causes behind the overpopulation are falling mortality rate, lack of women education and high rate of fertility. The consequences of the overpopulation which we face are food insecurity, environmental damage, climate change, poverty and increased conflicts. Unless these causes are addressed properly, the problem of overpopulation cannot be solved. So, serious efforts are needed to address this issue.
