# A Stone Thrown by a Palestinian Worths more than Entire Arab Arsenal:

## Outline:

A - Introduction.

B - The self-struggle of Palestinian  
is Better than the Entire Arab  
Arsenal.

- 1 - Showing Israel's atrocities ended  
the antisemitic narrative.
- 2 - Paving the way to recognize  
palestine as a state.
- 3 - Changing the point of view of  
Individuals regarding palestine issue.
- 4 - Showing the Israel's crimes and  
gaining sympathy for palestine.
- 5 - Exposing the double standard  
of western world.
- 6 - Their struggle changed the  
political aspect of palestinian cause.
- 7 - The wars of Arabs ended  
in failure.
- 8 - Having big arsenal, but unable

\_ \_ \_ 30

to achieve a safe passage for humanitarian assistance.

9- The inability of Arabs to achieve an independent state.

10- Unable to fight the ~~plight~~ plight of Palestine at international forum.

11- Their steadfastness and resistance for independence without weapons portray ~~positive~~ peaceful solution to Palestinian issue.

### C - Conclusion:

The sacred land of Palestine was a home to three major sects such as Muslims, Christians, and Jews. These nations had lived in harmony and peace until an event happened in 20th century. That event changed the fate and future of the sacred land. The event was the creation of Israel with the help of western world. The western world provided weapons to Israel and the era of atrocities

— 1 — 1 — 30

started in the sacred land. Palestinian started their struggle for an independent state without using force and committing atrocities. Their continuous struggle has ended the card of victimization that Israel has played to justify its crimes and atrocities. Moreover, showing the true face and atrocities of Israel to the world has paved the way for the recognition of an independent state. Furthermore, showing the crime of Israel through social media gain sympathy and change the opinion of world leaders and individuals regarding the issue of Palestine. In addition to this, they have showed the double standard of western power and complicity in crimes. In contrast Arab leaders have failed to achieve an independent state for Palestinian. Despite their tilt towards west, they have been unable to reach to

a peaceful solution of the issue and end the atrocities of Israel. In spite of having huge arsenal and armies, they are even unable to get a safe passage for humanitarian assistances. Therefore it is a fact that a stone thrown by a palestinian is better than the entire Arab arsenal.

Israel has played a card of antisemitism to justify its crime. Whenever someone try to criticize the Israel's atrocities they label ~~the~~ them as antisemitic. However, owing to the continuous self-struggle of palestinians ended this card. Now, people around the world do not buy this narrative as they know that criticizing a crime is not antisemitism.

In addition to it, palestinians ~~are~~ have educated the world regarding palestinian issue. Their

steadfastness and struggle ensured the world that Palestinians deserve an independent state. In this regard, a resolution was on the table to grant recognition to an independent Palestinian state. One hundred and forty plus countries voted in favor of an independent state. However, the US vetoed it, the struggle of Palestinians paved the way towards recognition.

~~Further more,~~

Furthermore, Palestinians have shown the on going genocide live through social media. This has changed the opinion of individuals across the world specifically in Europe. In Europe, many protests have been witnessed demanding ceasefire and peaceful solution to the Palestinian cause. It has been possible through self-struggle

\_ \_ \_ 30

rather than the Arab leaders.

To add to this, The Palestinian have exposed western world. The western world consider themselves as a champion of human rights. The unwavering support of western world to Israel has raised questions on their claims. They provide weapons to Israel which has been committing atrocities and genocide. Now, it will become the compulsion of western world to ensure an independent Palestinian state. So it is clear that Palestinians are fighting their case through awareness especially in the western world.

Another thing that Palestinians have done in political aspect of Palestinian issue. The dehumanization of Palestinian is compelling the world to give the right of self-determination to Palestinian. For instance the allied countries of

1-1-20

Israel thinking of weapons embargo on Israel. France has given green signal to Israel regarding this. It means that, the world is gradually recognizing that the right of self-determination should be given to Palestinian.

~~On~~ ~~can~~

In contrast, the Arab leaders have not taken pragmatic steps which result in the gain of Palestinian. Initially, the Arab leaders preferred war rather than political solution to Palestinian issue. The war resulted the further loss of Palestinian land. It is evident that Palestinians are performing better than the Arab Armies and leaders.

Secondly, the Arab leaders accepted the two state solution. Now they are unable to achieve an independent state for Palestinian. It proves that, they have failed

to get a solution ~~either~~ whether militarily or politically. Despite the alliance with the U.S.A., they are unable to influence their institutions to get a solution.

Finally, the Arab leaders also failed Palestinians at international forums. In spite of their good relations with Europe, they have failed to use their sphere of influence in the favor of Palestinians. For instance, the kingdom of Saudi Arabia signed the petrodollar agreement with USA. It could have used it to get an independent Palestinian state.

Recently, they are even unable to get an assurance from the west to ~~allow~~ pressurize Israel to allow humanitarian aid to Gaza.

It can be argued that they have become irrelevant in the plight of Palestinians. To sum up, Palestinians' struggle is better

the entire Arab arsenal.

In the last, Palestinians have used their soft power and ensure the world that they want a peaceful solution to cause. It is evident from the unfolding genocide. They are telling the world that they also deserve lives. It is undeniable that they have fought their case in good manner.

In a nutshell, Palestinians fought their case better than the Arab leaders. The world has awared due to the atrocities and war crimes of Israel. Palestinians have gain sympathy by exposing the double standard of western world. Moreover, their steadfastness is paving the way towards an independent state. Furthermore, the unfolding humanitarian crisis and famine has changed the opinion of individuals across the world.

\_ \_ \_ 1 \_ \_ 1 \_ \_ 30

In contrast, Arab leaders could not convince the world in 76 years ~~that~~ on the right of self-determination. Moreover, they could not use their influence on western power to gain an independent state. Their first choice of waging war without having military capability resulted in the loss of Palestinian territory. There is a hope that the awareness regarding Palestinian issue will result in a peaceful solution to the Palestinian issue:

xx ~~~~~ xx

End.
