QNO2

Title:

Search of peace in nuclear era.

While nuclear powers have capacity to destroy everything, yet, they will think less of maintaining peace. Unlike traditional wars, modern nuclear wars not only damage very present but it can also negatively impact coming future generations. Today, in search of peace, nuclear deterrence perceived to be essential. Despite the fact that this nuclear deterrence in reality can destroy world instead of maintaining peace, yet, no body shows positive attitude toward the real cause of disturbance, which is created by these nuclear weapons. There is no doubt that the leaders of great powers should change their attitude; ~~but~~ writer thinks every person, who want peace, need to change his attitude. For-instance

most of the people think, war is unavoidable in this era of nuclear technology; this is the biggest problem in our attitudes.

However, by changing our thinking, we can hope for the stability and peace.

### QNO3

(i)

Period of dryness is known as drought. It is a period when very little or no rain fell on ground for a long period of time, usually more than months. Droughts show very bad consequences. Streams and rivers dry as a result of no rainfall.

As a result, cattles and birds die. Crops become diseased producing poor yields.

(ii)

No, writer does not endorse the popular saying about the sky - A red sky at night indicating good weather while red sky during morning as indication of bad weather. He says, "this believe can be true for sometimes, but often prove wrong."

This is the reason behind massive weather science and other meteorological technologies. In short, these misperceptions were the reason behind technological advancement of weather forecasting.

(iii)

Weather forecasting is a science, often known as Meteorology. Ancient mis-beliefs created spaces for research on weather forecasting. Hence, Meteorology is the result of technological research and advancement of study in the field of weather forecasting.

(v)

Forecasting the weather is complex due to variety of interconnected factors such as; Atmospheric dynamics, where small changes can lead to large, unpredictable variations. This concept is known as "butterfly effect". Moreover, data limitation, machinery problems and rapid weather changes can make weather forecasting difficult.

(v)

Ancient people relied on monitoring moon in order to predict weather. Because there were no barometer or other instruments for this purpose. They thought moon controls the weather alterations. They believed, when sickle shaped crescent lay on its back, it indicates the rain is about to come.

### — Qno 4 — Corrections

iv) Being thoroughly dissatisfied with the painting he hid it in the closet.

## Qnos

A fly sat on one of the shafts of a cart and said to the mule who was pulling it, "How slow you are! Do mend your pace, or I shall have to use my sting as a goad."

The mule was not in the least disturbed.

"Behind me in the cart," he said, "sits my master." He holds the rein and flicks me with his whip, and him I obey. But I don't want any of your impertinence. I know when I may dawdle and when I may not."
