

Q2

## Rethinking peace in Age of Nuclear threat

The speaker highlights the importance of achieving peace in a world where the threat of nuclear warfare makes traditional war meaningless. Given that one nuclear weapon can cause vast destruction and long term damage to the environment, the ongoing arms race is not a viable solution. Despite the significant financial resources devoted to weapons that are supposed to maintain peace, this strategy is fundamentally flawed. Pursuing peace may not be as dramatic as engaging in war, but it is crucial & urgent. He mentioned both individuals and nations to rethink their perspectives on peace and to reject the pessimistic belief that it can not be achieved. By clearly defining and actively working towards peace, humanity can create a hopeful future instead of resigning itself to conflict.
