Upon this, plaintiff argued that he felt his rights were violated. To pacify

him judge added that he understood his grievance but without valid ground he was unable to grant him relief. plaintiff asked if there was anything he could do. Judge replied in negation and said that law ^{did} not permit anything in this regard. Judge plaintiff agreed with judge's point and thanked him. Judge, then, dismissed the case.

Q3 Read the following passage carefully and answer the questions that follow.

i- What is drought and what are its consequences?

Drought is a condition when no rain falls for a long time. It is a situation of lack of desired water and dryness spreads all around. During the period of drought water reservoirs, be it river or stream, dry up. As a result, the cattle die and crops are destroyed owing to the want for water. Human being and overall ecosystem suffer during the period of drought.

ii- Does the writer endorse the popular sayings about the red sky?

The writer first mentions the popular sayings about the red sky. He does not completely con-
nect with these sayings, nor does he completely negate them. He is of the view that such sayings are, at times, true but most of the time they prove wrong. He further adds that owing to uncertainty factor in these sayings, weather science or meteorology was discovered.

iii- Is weather forecasting a science; if so, what is it called?

Weather forecasting is a science based on evidence based facts and it is called weather science or ~~metereology~~ meteorology. Meteorology is the branch of science in which each factor affecting the weather is considered. Then these factors are carefully studied and on basis of this study, a fairly accurate forecast is made. Forecasting is a complex phenomenon and it might not be hundred percent accurate at times.

iv. Why is it not easy to forecast the weather?

Weather forecasting is not an easy phenomenon because of the dynamic and unpredictable nature of the factors that contribute to change in weather. Weather is made up of six main components namely temperature, atmosphere pressure, cloud formation, wind, humidity and rain. These components frequently show fluctuations and so forecasting the weather becomes difficult.

v. How would the moon help the people in forecasting weather?

In the past, people used to forecast weather with the help of moon. They were of the opinion that it is moon that controlled and managed the weather patterns. They used to predict that moon has held and stored a lot of water in it. It was particularly thought true when a crescent sickle shaped moon it laid on its back. Even in contemporary times, some people believe that the sight of the moon lying on its back is indication of upcoming rains.

Q # 2

Title: Attainment of peace: Hard
But not Impossible

The author says that to advocate for peace in these times when war seems inevitable is essential.

The powerful nations have gathered dangerous nuclear weapons in large number that the very survival of human being is at stake.

Nations are trying to maintain peace through 'lethal weapons' compilation which makes no sense. Therefore, it is crucial for

states to act for attainment of peace under such circumstances. Some people keep a pessimistic view about peace but hope should be kept alive.

Before compelling powerful actors to contribute to maintain

peace, every individual should start from himself. The behaviour of individuals should reflect peace and everyone should

realize that peace is not a distant dream but an attainable reality.
