

# THE NATION RISES WITH RESPECT FOR TEACHERS

## Introduction

1) ~~Relation of 'Nation' and 'teachers'~~

2) The Nation rises with respect for teachers.

(2a) Relation of the terms 'Nation' and 'Teacher'?

⇒ (violence against children in school)

(2b) ~~idea~~ Little respect towards teaching leads to lack of awareness.

⇒ (weak voting system)

(2c) Ability of teachers to change nations

⇒ (Greek and Islamic civilizations)

(2d) History ~~and~~ informs us of stronger nations having respect for their teachers.

⇒ (Martin Luther King Jr.)

(2e) Teacher as the backbone of strengthened nations.

Case study ⇒ Malala Yousafzai.

## 3) Spread of Islam: respect for teachers and teachings

3a) Eradication of the darkness, the Prophet's teachings illuminating the Arabia.

(Hadith ⇒ Verily! I have been sent as a teacher to man kind)

Date: \_\_\_\_\_

M T W T F S

(3b) Quran as a teacher and muslims respect for it.

⇒ (Example ⇒ Iran and strive for Palestine)

(3c) Weaker Islamic Institutions, leads to weaker Islamic states and less respect for clergy.

⇒ (Madrasahs in Pakistan)

4) Forms of teachers and inclination towards them leads to progress:

4a) Teacher to oneself.

4b) Books as a teacher

⇒ (political party could be a teacher)

4c) Political party as a teacher

⇒ (Iranian revolution)

5) Nations if teachers are not valued:

5a) Setbacks to nations if teachers are disrespected.

(Pakistan ⇒ 25 million children <sup>out of school</sup> are of school)

5b) Lack of adequate teachers

⇒ Room for change to help nations rise.

⇒ (China)

• Conclusion.

## THE NATION RISES WITH RESPECT FOR TEACHERS

For a tree to grow in its best form, the ~~roots~~ seed needs to be placed properly and nourished. Similarly, the rise of a nation is directly proportional to the respect of teachers. The way a seed is nurtured and taken care of; the teachers needs to be respected and adored.

Making the nation rise. In order to examine the nation and their effectiveness, one must observe its roots. Education and teaching system is among the first seeds that either make or break a nation.

Nations experience mobility and rise when the populace give more value to their teachers. In turn, the motivation provided makes the teacher enthusiastic to bring changes and shape the youth into their best version. This youth then shapes the nation.

Date: \_\_\_\_\_

②

The two terms: "Nation" and teachers are intertwined and cannot be untangled. Teachers with good intent, proper knowledge, and good education are able to make stronger nations. On the other hand, weak nations do show a history of weak ~~profess~~ fraternity of teachers. Students who are nurtured by teachers, have more increased inclination and affection towards their teachers. Such students adore them and ~~love~~ have a strong will to adopt the qualities of their teachers. However, teachers who use their profession ~~just~~ solely for the source of income does not shape the affection of students for them. This approach demotivates the children and avoid choosing teaching as their profession. For instance, the use of violence against children in schools in developing and under-developed countries have shown lack of interest of children in the attaining education. These children when grow up,

③ becomes decentised towards violence, and ~~it~~ They ~~at~~ ~~then~~ Consequently, using force against others in future. This is, thus, the ~~not~~ reflection of weak nations. In the rural areas of Pakistan, children avoid going to school because of the violence and harassment they face at the hands of their teachers.

Besides, weak nations reflect the lack of interest in the education system. Nations where education and teaching profession is not valued, reflects the weaker roots. ~~It~~ It shows how fragile a nation is. Such nations could easily get manipulated. As in such nations, lack of stronger and efficient teachers makes it impossible for masses to navigate in the darkest eras. In ~~For instance~~ such nations there is no or little awareness about the uplift of nations. They find it hard to choose the right leader for themselves. Additionally, they

Date: \_\_\_\_\_

fail to find solutions to the underlying problems. Such nations face a pile-ups of problems, one above another, making hard for them to experience light at the end of the tunnel. A report Reports informs us how weak the voting system of nations are who pay no attention to the respect of teachers or education system. ~~Patel's Down Date~~

Teachers have the ability to change and shape nations. They can make or break nations. Additionally, they can initiate the cycle of education educating children. In turn these children grow up to become teachers. Teachers who become role models can be helpful in creating a solid base for the rise of a state.

From past to present, we have seen multiple examples of teachers and ~~or~~ ~~int~~ or intellects shaping nations. For ~~was~~ example, the Greeks provide us huge example through Socrates, Aristotle and Plato etc. Through them

Date: \_\_\_\_\_

M T W T F S

⑤ their philosophies and teachings the Greek civilization is still studied and known even in the 21st century. Similarly, the rise of Islam in the era of 'Jahiliya' or ignorance is an ~~e~~ evident example of how teachings with proper guidance can illuminate the areas where there is no light.

History informs us, how wise men through their teachings have ~~brought~~ ~~e~~ created a space for change and through the worlds light have entered, but with a proper guidance and direction provided by a teacher. Martin Luther King Junior once said, "Darkness ~~cannot~~ cannot drive out darkness, only light can do this". The light is provided by the teachers, and this light circulates within ~~the~~ masses the love for teachers, leading to a prosperous and progressive nation

Date: \_\_\_\_\_

The teacher is the backbone of a strengthened nation. Nations who stand tall have intellects that are shaped by their respective teachers. For instance; Elon Musk, Bill Gates and many others must have had someone to shape them the way they are today. Since teacher is the main pillar, it creates nations that cannot be broken.

This, however, reflects the importance of education. Guidance can teach ~~us~~ people to be the best version of them selves. It brings all the talents and abilities to the surface. An example of Malala Yousafzai, who had her father as a guide. ~~was~~ He was a teacher by profession and enabled his daughter to write a book against the violence in Swat, due to insurgency. A time where no one could speak against the atrocities, Malala took a bold step since she had her father, in the form of teacher. Malala ~~is~~ ~~is~~ herself reflects the

④ importance of teacher and education in her work. She writes, "One pen, one teacher can change a nation."

Similarly, the rise and expansion of Islam is the result of proper teachings and peoples respect for the ones that taught it. When one delves into the history, before the arrival of Islam, the Arabs were ignorant. The rich were getting richer and the poor were becoming poorer. Prophet P.B.U.H changed the mindset of people and was immensely respected. There is a hadith that says, "Verily! I have been sent as a teacher to mankind".

Moreover, the Quran itself is a teacher and provides guidance on every path of life. The words of God (Allah) are respected and widely read. For nations ~~Nations~~ Muslim nations with deep understanding of the Quran are

Date: \_\_\_\_\_

F S

fearless and are aware of the pros and cons of what they do. It were only the stronger and fearless nations that stood against Israel, during the war in middle East. The leader of ~~Israel~~ Iran, in a Friday prayer ~~publicly~~ publicly declared that it would stand with Palestine. The reason behind this is faith, and this is provided by the Quran and Sunnah that themselves are teachers.

Islam values education and teachers. It has asked the believers to respect their teachers. This is the major reason of the expansion of Islam. However, inadequate information and teaching methods of Quran has eaten the roots of Islamic education in some areas. In Pakistan, the harassment in Madrasahs has ~~lead~~ ~~the~~ incultated ~~students~~ within masses the hate for teachers in Madrasahs. This ~~shows~~ ~~how~~ reflects disrespect for teachers. which ~~makes~~ ~~we~~ gives birth to weaker roots.

9) Additionally, teachers can take many forms. If these forms are valued respectively, these can lead to a prosperous and progressive individual. These individuals can then combine to collectively help the nation rise. An individual can become a teacher to oneself, if ~~he~~ he respects himself it could inculcate within him the sense of improvement. Similarly, a book can be a teacher too. Books provide knowledge of dos and don'ts. Furthermore, others ~~te~~ can be teachers and teach through their actions and words. If these are respected, they can play a major role in shaping nations. For instance, a political party with proper ~~teaching~~ motives can ~~enable~~ ~~mas~~ attract the masses respect. This then inculcates within them the sense of revolution. Iranian revolution is an evident example of this. The oust of the Bangladesh leaders, who were corrupt, reflects the importance of strong base and rise of ~~the~~ nations.

⑩ ~~If one~~ ~~On the other~~  
Contrasts Contrary to stronger nations,  
are weak nations <sup>that</sup> ~~which~~ do not  
have ~~res~~ hold respect towards  
the education system. When  
teachers are given less value  
their inclination and enthusiasm  
for their field weakens. Such  
teachers do not pay attention to  
what they teach. For example  
in Pakistan the education system  
is not valued. The government  
pays little attention to the  
education system which makes results  
~~the~~ in loss of respect for the  
profession and system. This is among  
the major reasons of Pakistan  
lagging behind in the global race.  
A report shows that 25 million  
children are out of school. The  
data make it evident of the  
fragile nature of the education  
system in Pakistan. The teachers  
in government schools, specially  
in rural and backward areas,  
use violence ~~and~~ against students.  
In the recent past videos had  
been circulating where a child

Date: \_\_\_\_\_

M T W T F S

② was beaten to death by the teacher. The children who witnessed the scene lost respect for teachers, and also the education system. Among other reasons this, too, is a reason of the immigration of students to foreign countries for their studies. In the few previous years more than a report shows that at least more than 700,000 students left Pakistan. This brain drain and loss of talent is a huge setback for Pakistan. Additionally, ~~this~~ As a result of losing its well educated people, Pakistan is far behind from other countries.

Furthermore, lack of teachers leads to inability of nations. Nations where no proper ~~no~~ number of teachers are available, ~~makes~~ leads to increase in burden on the existing teachers. This makes the teachers disoriented, making them unable to pay attention to development and progressive strategies. For instance, in ~~in~~

Date: \_\_\_\_\_

M T W T F S

② areas where government has kept lower budget for teachers and schools. People ~~feel~~ avoid choosing teaching as a profession. This ~~leads~~ creates burden on teachers ~~that~~ that are already working.

For nations There is

However, there is always room for a change. For nations to grow certain measures should be taken. Among those measures the teaching system and teachers should be kept a priority. The day teachers are respected, the first step towards progress will be taken.

Uplifting of nations can be guided by teachers. Teaching students ~~can~~ is similar to engraving in stone. The rise of China is an example of how ~~to~~ it. ~~teaching~~ China's technology could be taken as an example. The youth of China has an eminent

⑬ respect for their teachers and mentors. This is the reason why China has seen change and experienced rise in the past few decades.

Similarly, people who read more and have strong inclination towards books reflect show how different their personality is from others. ~~Books~~ As books tends to be teachers. In a similar manner, if these individuals come together for a cause they can bring a huge change.

On an individual level, mothers can also be a guide towards progress. Mother is the first teacher the child learns from. If these individuals taught by their mothers in a way that is needed, can collectively change nations and help it rise. For example Arshad Nadeem from Pakistan who stood first in Javelin throw in Olympics, and his counterpart from India acquiring

Date: \_\_\_\_\_

(M) (T) (W) (T) (F) (S)

the second position. Both of their mothers praised both of them ~~which~~ during times where Pakistan and India are more foes than friends. The video circulating on internet was praised by many. This ~~wa~~ is an eminent example of mothers ~~beca~~ acting as teachers and the way the change they provide pave the way for change.

Date: \_\_\_\_\_

M T W T F S

13 To conclude, in order to become strong nations the teachers must be valued. Circumstances should be created where there is more respect for teachers. As teachers can help bring change. History provides examples of nations facing catastrophe due to their multifaceted problems that they could not address. Hegel says, "we learn from history that we do not learn from history". But ~~we~~ <sup>one</sup> has to work opposite to this idea. History can be avoided to repeat if strong <sup>measure</sup> ~~measures~~ and determination ~~are~~ <sup>is</sup> adopted.
