### iv- Disunity among nation.

a- fighting with each other, providing a chance to enemies.

v- Due to corrupt and self-obsessed politicians.

## 3 Conclusion.

## THE ESSAY:

An ideal time that once gone will never come back!

The great leader Quaid-e-Azam gave advice to the new born nation via radio on 30<sup>th</sup> Oct 1947. The Quaid said: "Work, work and work and we are bound to succeed." He gave advice that in such a way that a nation must succeed if its people do hardwork. In the past, we have seen many examples that realized us that as a nation we also have to do hard work. we have to devote ourselves but now a days we are failed as a nation when we look towards a underdeveloping country Pakistan. Quaid-e-Azam gave this country to us, to provide us freedom and independence from Hindus but even after 77 years of independence we are still standing at the point

from where we started. We at The nation fails due to many reasons/ causes. i- Not giving first priority to Education. a- ii- Involved in Politics iii- Involved in Corruption iv- Disunity among nation v- Due to corrupt and self-obsessed politicians.

firstly, a nation fails when the people were not giving first priority to the education. Education is a the most powerful weapon which you can use to change the world. (Nelson Mandela) Education is a power that any nation can use to get success and to fight with its enemies. In Pakistan, there are many people who were ~~enjo~~ were neglecting the importance of Education and give preference to a job of 20,000 to 30,000/- salary. They are giving more priority to jobs or small bussinesses than the education. The youth is the future of our nation. If the younger generation is involve in other activities

like social media especially tiktok, daily vlogging on youtube and on facebook that why not the future of our nation will destroy.

On the other hand, there are many people who give priority to going abroad than live in their own country and provide benefit to our own nation as well as our country. When we are neglecting our main weapon, power. So then <sup>how</sup> why not we <sup>not</sup> failed as a nation.

Secondly, the other reason for the failure of nation is that we are more involved in politics. Even in the history, the very well known personality Sir Syed Ahmed Khan advised people not to involve in politics and give more focus on getting higher Education but we cannot learned from our history we are still involving in politics by participating in Jalsa, Rally and by fighting for these Self-

Loving politicians that never think about us. We are fighting with our family only for the love of these politicians. What we are doing? We are suggested by our great leaders: Quaid-e-Azam, Allama Iqbal to stay away from politics and they advised us again and again to focus on studies and then succeed as a great nation. But we forget everything and we are doing opposite of their advices. Then, how we not failed as a nation.

~~Thirdly~~, In the blind love of these politicians, we are destroying our beautiful homeland. Our childrens especially younger ones going into the jalsas of these politicians instead of going to Universities and Collages. They are wasting their precious time that once gone will never come again.

Thirdly, & The reasons for the failure of a nation is that we are involved

in corruption, we are involved in bad activities for the sake of having money. In Pakistan, the most corruption is at education levels where the lower staff take bribe or big amount of money in order to pass a failed student from his parents. ~~Not all but some of the teachers who were giving low salaries in the schools and colleges especially in Govt colleges.~~ In Govt offices, the lower grade employees take bribe to pass a file of illegal documents. ~~on the behalf~~ In hospitals and many other departments, we are involved in corruption. So, when the people of <sup>the</sup> nation are themselves involved in corruption then ~~to~~ why ~~not~~ we <sup>not</sup> failed as a nation.

Fourthly, the other main reason that why a nation fails is disunity among the people of nation. If we saw that how we started for the

beginning, we realize that the unity among the people is very important. we can take an example from our history that how Quaid-e-Azam succeed in his mission, that how Pakistan came into being. first of all there is an spirit of having a separate homeland for Muslims then there is an hard work and struggle of Quaid-e-Azam along with his fellows, his sister.

There are many great people who were devoted their life for the independence of us. Their only strength is their unity which stand beyond them and they fight fearlessly and selflessly.

But the question raises there is that can we follow them? The answer is NO because we are fighting not for <sup>each other</sup> ~~ourself~~ but with each other. We are fighting not with our enemies, we are fighting with our brothers and provide an

open opportunity to our enemies to do attack on us. We are only united on the day of celebration of 14th August 1947, on the birth day of Quaid-e-Azam and by playing national anthem and by wearing green and white clothes and by wearing flags on our clothes but in reality we are not united. If we are united then not for the future of our country. we are worried about our own future. ~~about~~ we are snatching money from each other to become rich. Then why not a nation fails.

fifthly, a nation fails when we have corrupt and self-obsessed politicians or leaders. The politicians or leaders are those whose run our country, make us comfortable and secure in our country, provide us freedom and liberty. But the politicians we have, are

tailed to be a politician because they are worried about their position, government, their expensive or luxuries lifestyle only. They are not worried about us. They are not worried about the future of our children. Whoever politician came into power, he completely ignores the necessities of us. They always think that how they defeated their opposition. They used <sup>as</sup> their tools or the path to their position or power they want. In the early history of Pakistan, we have had leaders like Liaquat Ali Khan who was a rich landlord in the sub-continent. However, he migrated to Pakistan leaving all his riches behind, only to serve this country. We had another examples like that of Allama Iqbal who returned to the subcontinent after completing his higher studies abroad to steer the Muslims towards the right

path to and to highlight their target for them. We had ~~and~~ another example of Quaid-e-Azam who was a highly successful lawyer and enjoying all kinds of luxuries in England before returning to the subcontinent and striving day and night to achieve a goal ~~a~~ separate homeland for Muslims. But now we have the leaders which were misguide us and not promoting the peaceful environment for our childrens, womens.

In the end, we conclude in such a way that we when we have all these things in our country and we are also involved in such activities then how we think that we are a good nation or we are succeeded as a nation. Until or unless, we are not giving our first priority to education, we are still involved in politics and

corruption and we have disunity among  
ourselves then we ~~we~~ will remain  
as same as we are now and ~~we~~  
~~are~~ that are the reasons that ~~how~~  
why a nation fails and for moving  
from failure to success, we have  
to do work hard, ~~to~~ be honest and  
be loyal to our country and get  
higher education to resolve these  
problems and to become a great  
nation and by ~~to~~ acting on the  
advice of Quaid-e-Azam, we can  
make his dream to

"Look forward to Pakistan becoming  
one of greatest nations of the  
world" come true!
