4. Technological advancements and Innovations.

- 4.1 Digital Deterrence and Cyber Security.
- 4.2 Military and Defence Technology.
- 4.3 Enhancement of Diplomacy through technology.
- 4.4 Digital Infrastructure and trade dominance.

According to Sun Tzu, the greatest victory is required without battle. In his book "Art of War", he discusses how nations achieve victory without resorting to conflicts and contention. It is a well known idea that previous nations have fallen prey to inter decay and have lost their position in the eyes of other countries. So is the case with nations

(3)

that become great because they have cope up with internal conflicts and tensions. The great nations have numerous factors in making themselves great and grand in the goodbook of other countries. There are some factors which are indispensable to achieve the status of great nation without fighting. These factors include: healthy educational system, economic stability, gender equality and technological advancement. Amongst several factors, these are the few to achieve a status of great nation without fighting.

Firstly, the healthy educational system beats all odds of a nation. When it comes to win without war, ~~the~~ education is a first and foremost step to set ~~the~~ journey. Sir Sayyid Ahmad Khan set the educational framework for muslims at the time of independence to beat the enemy. Owing to education, the sense of competition arises, which opens avenues to enlighten the soul and spirit of a nation. Allama Muhammad Iqbal with his eye-opening

(4)

poetry enlightened the muslims for their rights. The competition and its sense in excelling ahead. The Curricula must be adapted to achieve the great nations. The perfect curricula changes the mindset. It evokes the mind to challenge the status quo. The syllabi must be wider enough to open new vistas of knowledge and learning. The overall theoretical syllabi lacks in implementation but it must be coupled with practical application which can cater to new opportunities for learners. Another factor that can make nation win ^{without} the war is an initiative toward research oriented programs. The research is mandatory to open new arenas in all the fields of life. The research is the flesh and blood of every subject. to make it comprehensive. Last but not least the training and development workshops if coupled with research can do wonders. The trainings and developmental programs provide the nation a weapon that can overcome the internal resistant in passive learning.

(5)

Secondly, the economic stability is the greatest of all to be a great nation without war. The great nations do not rely on loans and trenches. Rather they ^(nations) work on ~~the~~ its own resources to create revenue. This is the internal factor ~~which~~ that makes nation stronger and powerful. The less resistance on IMF, the more chances to raise economic stability. After less resistance on IMF loans, there comes the sound export system to sustain the nationhood. According to an overview in 2022, Pakistan stood at 66th in total exports. This shows the underlying idea how Exports can be beneficial for a country's stable economy. There is another wizard, that can be helpful in achieving the formation of nation as great as it can be, is taxation sustainability. Every person in the state is held accountable and asked to submit his/her return. The average taxation FBR has collected is Rs. 9,306 billion in FY(2023-2024) against the target of Rs. 9,252 billion by exceeding the yearly target by a margin of 54 billion. So, this uphill task is the remarkable in passive manner.

(6)

achievement. In addition, the regular recruitment is another feather in the cap of great nations. The great nations utilize its brains and in their system with talent, devotion and dedication. In contrary to it, the nations, whose brains are migrated to other countries, suffer at large. So, the regular recruitment in departments is another level of winning laurels.

Thirdly the gender equality has done wonders to great nations. The right to life, the safety and security of all sexes, the complete removal of biasness against the women and protection against social crimes. In all great nations, there is one common element of giving respect to its subject. The nations become great when there is an environment of equality and no hegemonic powers exert pressure and influence. Every Constitution has bestowed right to life to its humans. Moreover the safety and security of all the sexes is another accountability on the part of great nation to look after.

(1)

The successful nations have no space for gendered stereotypes which create trouble in the developing countries. But the ^{great} nations ~~with~~ do overcome these often-knead stereotypes and held due respect to each gender in every walk of life. Last but not least the subjects of great nations ^s enjoy themselves the protection against crimes and seek help from their ambitious institutions. To put it simply, the great nations are great because they give due dignity to its subjects and vice versa.
