DATE: ___/___/___

2.4.3. No proper road map

2.5. Violation of International Indus
Water Treaty

2.5.1 Role of India

B) Consequences of Water Crisis in Pakistan

2.1. Economic challenges

2.1.1. Agrarian nature of economy

2.1.2. Economy of country affect badly
due to less export

2.2. Health issues

2.2.1. Shortage of fresh and pure
water

2.2.2. Sanitation problems

2.2.3. Numerous diseases spread

2.3. Electricity crisis

2.3.1. Loadshedding

2.3.2. Expensive electricity bills

2.3.3. Burden on economy

3- Conclusion

According to Churchill "People can live without love but not without water". Water is the most precious resource in the world. Without it, life would not be possible on this planet, earth. Our survival on this planet can be ascribed to water. Unfortunately, Pakistan is facing water crisis due to mismanagement of water resource, climate change, urban housing schemes, political crisis and violation of water agreement. These causes have severe consequences i.e economic challenges, health issues and electricity crisis. Therefore, proper strategy should be made by the government on urgent basis in order to counter the issue of water crisis in Pakistan.
