• BATCH : ONLINE - ISL(070) .

• QUIZ : 02

TOPIC :- OVER POPULATION : "ARISING MONSTER"

◦ Rough Work / Brain Storming!

OUT-LINES :-

I- INTRODUCTION

- a) Hook
- b) Background
- c) Thesis statement

II- MAIN-BODY

1) **LOWERING LIVING STANDARD :-**

2) **BURDEN OVER ECONOMY :-**

3) **UNEMPLOYMENT :-**

- a) crime rate increases
- b) poverty increases
- c) increase in poverty

4) **DEFORESTATION :-**

- a) infrastructure and development

5) **CLIMATE CHANGE :-**

- a) deforestation
- b) hindering agricultural development
- c) water / food crisis
- d) natural habitat destruction

6) **URBANIZATION :-**

- a) Demographic shift results
- b) Overburdened Health & Education sector

③

7) IMIGRATION :-

III- CONCUSION :-

INTRODUCTORY

PARAGRAPH WRITING

• ESSAY :

OVER POPULATION : A RISING MONSTER

"It's our population growth that underlies just about ~~every~~ every single one of the problems that we've inflicted on the planet. If there were just a few of us, then the nasty things we do wouldn't really matter & Mother Nature would take care of it — but there are so many of us" (Jane Goodall). Human population increased rapidly over the past 2-centuries, which raised concerns

4

that humans are bringing to overpopulate the planet Earth, which in near future earth may not be able to sustain. This rapid growth in population has become a global problem and Pakistan is no exception to this ticking bomb. Since, its inception Pakistan inherited problems such as poverty, political instability, corruption and many more. However, overpopulation has further added to the fire. Some of the major impacts of rapidly growing population are shortage of food and water resources, lack of infrastructure or housing facilities for such a large no. of population, overcrowding cities, unemployment and immigration. Hence, the repercussions of an ever expanding population are

⑤

manifested. However, ensuring economic growth and minimizing poverty scale is proceed by control population.
