Title : "Healthy Minded People Prefer their Work than Money"

The well-educated, strong and rightly trained man prefers his work instead of money. Likewise, all healthy minded people enjoy their work, which is better than money. Similarly, the goal of soldier is to win battles not to make money.

The clergymen's work is preaching not to be paid for preaching. As like as, the priority of a doctor is to treat patient fairly rather than for money. Therefore, all the well-educated and disciplined men prefer their work first than money.
