

## My job in a Apple Plant

### Activity 1

Point:- Working in an apple plant is the worst job I ever had.

Reason 1: The work was physically hard

- a. Loaded cartons onto skids for ten hours a night
- b. Cartons, contained bottled apple juice, moved down the track continuously.

Reason 2: The pay was very low

- a. Minimum wage was \$3.55 an hour
- b. Had to work sixty hours for decent take-home pay.

Reason 3: Working Conditions was worst.

- a. Two ten-minute breaks and an unpaid lunch.
- b. Spent hours on the loading dock in freezing temperatures
- c. Loneliness on job.

(1) No interests in common with other workers

(2) By myself for two hours cleaning the apple vats

## Homework Assignment #01

Topic :-

"Climate Change in Pakistan: Causes and Consequences"

Brainstorm

Climate Change

Causes

- Greenhouse gases Emission
- Population increase
- Solar radiations
- Tectonic plates
- Volcanic activities
- deforestation
- Fossil Fuel Consumption Combustion
- Agriculture revolution
- Industrial revolution
- Air pollution.
- Globalization.

Effects

- Extreme Weather Events
- Rising Temperature
- Frequent Flood and Droughts
- Economic impacts
- Health Threats
- Displacement and migration
- Agricultural issues.

Solutions → ◦ Renewable energy

◦ Afforestation Efforts

- Green Pakistan initiatives

◦ Increased Climate Education & awareness

## Essay

### Climate Change in Pakistan: Causes and Consequences

#### Outline

#### 1. Introduction

1.1: "We are the first generation to feel the impact of climate change and last that can do something about it." — Barack Obama

1.2: Climate change in Pakistan

1.3: Causes and Consequences of climate change in Pakistan and need for action

#### 2. Causes of Climate Change in Pakistan

##### 2.1: Natural Causes:

- i - Solar radiations
- ii - Tectonic plates
- iii - Volcanic activities

##### 2.2: Manmade Causes:

- i - Greenhouse gases emission
- ii - Deforestation
- iii - Fossil Fuels combustion

Date: \_\_\_\_\_

Day: \_\_\_\_\_

iv - Population growth

## 2.3: Economic drivers:

i - Globalization

ii - Agricultural Revolution

iii - Industrial revolution and  
air pollution

## 3. Consequences of climate change in Pakistan

### 3.1: Extreme Weather Events:

i - Rising temperature —

Global Climate Index report

ii - Frequent floods and droughts —  
displacement and migration

### 3.2: Health Threats

### 3.3: Economic impacts:

i - Agricultural issues —

World Bank Report.

## 4. Strategies to tackle these

devastating effects of climate change

## DS - Conclusion

Date: \_\_\_\_\_

Day: \_\_\_\_\_

## Introductory paragraph you Climate Change ----

Barack Obama says on climate change,  
"We are the first generation to feel  
the impact of climate and the last  
that can do something about it."

Climate change is neither a new issue  
nor it is a fully settled one. Developed  
countries are dealing with it successfully.  
Whereas, underdeveloped countries are still  
struggling. Unfortunately, Pakistan is one  
of the countries most vulnerable to climate  
change, facing extreme weather and resource  
scarcity. The main causes of climate  
change in Pakistan are greenhouse gases  
emission, overpopulation, natural events,  
globalization and industrial revolution. The  
consequences of climate change in Pakistan  
are extreme weather conditions,  
climate refugees, health threats and  
economic impacts. These causes are  
not new in nature but their intensity

Date: \_\_\_\_\_

Day: \_\_\_\_\_

is far greater in Pakistan. So, serious and honest efforts are needed to solve/reduce the impacts of climate change
