Translation:

History is full of such successful people who began ~~begin~~ their life with most difficult times. But, later they were counted in world renowned personalities. Success, dignity and fame are never handed to you on a plate, only wealth can be handed to you on plate. There is also a condition that your ancestors should have property, then you can get wealth. From wealth you can buy worldly accessories but you can't buy happiness. Sometime man spend centuries to earn dignity but it only takes a movement to be disgrace.
