

Essay:
CLIMATE CHANGE IN PAKISTAN:
CAUSES AND CONSEQUENCES
(Brainstorming, outline, Introduction)

BRAINSTORMING:

OUTLINE:

1. Introduction
 - 1.1 Attention Grabber
 - 1.2 Supporting sentence
 - 1.3 Thesis statement
2. Main Body
3. Causes of climatic change: an overview
 - 3.1 Climatic change in Pak
 - 2.1. Deforestation
 - 2.2 Industrial gases
 - 3.3 Greenhouse gases
 - 3.4 Fossil Fuel Burning
 - 3.5 Lack of education/awareness
 - 3.6 Fertilizers/pesticide use in agriculture
 - 3.7 No proper drainage system
 - 3.8. Urbanization
 - 3.9. Vehicles
 - 3.10 Volcanic eruptions
 - 3.11 Landfills
 - 3.12 Poor Policies
4. Consequences of climatic change
 - 4.1. Glaciers melt
 - 4.2 Ozone layer depletion
 - 4.3 Skin Cancer, allergies
 - 4.5 Global warming
 - 4.6 Temperature rise
 - 4.7 Distinction of species
 - 4.8 Acid rain
5. Measures Taken by Pakistan
 - 5.1. Billion Tree Tsunami
 - 5.2 Electric Vehicle Programme
 - 5.3. Awareness Team

- 5.4 Kyoto Protocol
- 5.5 Paris Agreement
- 5.6 Montreal agreement
- 6. Conclusion.

Introduction:

Barack Obama in his speech at the United Nations Climate Summit (2014) in New York said, "We are the first generation to feel the impact of climate change and the last generation that can do something about it." Climate change is an alarming and serious condition from which the world today is suffering. It is a problem not only Pakistan is facing but the whole world. Although, Pakistan contributes less than 2% to climate change around the world but it is one of the countries that gets greatly affected by it mainly due to its geography. Climate change is like a bomb prevailing over the head of Pakistan that can erupt at any given moment and this is why serious measures need to be taken, otherwise it can get out of control.
