### Translation:

History is full of those successful people who started their lives from immense difficult times; however, after a period they were considered the world most successful and famous personalities. Success, dignity and popularity is not easy to gain, only money is earned easily. For this also, one condition is necessary that your ~~ancestors~~ predecessors must have wealth. ~~to that~~ you may ~~is~~. Only then you will get money. You can have materialistic things from money but not happiness. Sometimes it takes decades to earn respect for humans, whereas for humility or decadency only a second is enough.
