

"Work is the First Priority of Visionary People"

The prime purpose of a visionary man's thoughts could not be to make money. For instance, all fit men like their dinners but dinner is not the chief object of their lives. Likewise, all sane people admire money making and they should cherish the sensation to get it. But the journey through which they achieve money is more sensational. Rightly educated and brave men including soldiers, doctors, clergyment etc., always prioritize their work above money despite its ^{huge} importance.
