## The value of work vs. Money

For well-educated, intellectual and healthy minded people, <sup>making</sup> money should not be the main purpose of their lives just like how enjoying dinner is not life's main objective. As, a good soldier's aim ~~is~~ <sup>is</sup> to win battles, not to be paid; a clergyman's purpose is to preach, not to earn money; and a doctor's job is not to heal, not just to collect <sup>the</sup> fee. ~~So~~, for all the ~~trai~~ proficient men's, the value of ~~their~~ <sup>their</sup> work comes first, and money is secondary, but still important.

main idea is picked but issue of sentence structure sentences are too long and there is no word count need improvement in all aspects
