Work as priority over money.

Precis title: For intellectuals, money is second choice.
Intellectuals and educated people keep money as second choice. As for healthy, dinner is main but not the primary option, just as a well-known like sensation of making money; not money. A good soldier will always wish to win even if kept 10 years away from battlefield, same is for a clergyman, who will always wish to preach. A good doctor will always desire to care the sick and will keep fees as second wish. So, for all proficient fighters, work is primary duty.
