Impacts of climate change:

- i- Agriculture impact
- ii- Glaciers melting
- iii- Extreme weather conditions
- iv- Economic impact
- v- Human health.
 - Skin problems
 - Asthama
 - Fungal infections.

Intro:

Barack Obama says, "We are the first generation to feel the effects of climate change and the last generation that can do something about it".

Climate change is neither a new issue nor is it a fully settled one. Developed countries are dealing with it successfully. Whereas, developing countries are still struggling. Unfortunately, Pakistan is one of them. The main cause behind climate change is deforestation, CFC's, transportation, chemical industries and green house gases and they gradually impact the economy of Pakistan, agricultural impacts, Extreme weather conditions and risk of health. These problems are not descended from heaven but they are man-made. Therefore, to address the issue of climate change in Pakistan, it is essential to adopt sustainable practices, expand renewable energy, improve water management and enhance disaster preparedness, and reforestation.

My Job in an Apple Plant

Activity:

Working in an apple plant is the worst job I ever had.

Reason 1: The work was physically very hard and repetitive task make it worse.

- Loading cartons onto skids for ten hours a night.
- Each carton contained twenty-five pounds of bottled juice and they came down the track almost non-stop.

Reason 2: Another bad feature of the job was the **LOW** pay.

a. was getting minimum wage at that time, \$3.65 an hour, plus a quarter extra for working the night shift.

b. Had to work sixty hours for decent-take home pay.

Reason-3: Lastly, hated the working condition.

a. Two ten-minutes break and an unpaid lunch.

b. Mostly time was spent outside on the loading dock in near zero degree temperature

c. Loneliness on job.

1. No interest in common with other workers.

2. By myself for two hours cleaning the apple rats.
