Causes and Impacts of Climate Change on Pakistan

"Climate change is happening, humans are causing it and I think this is perhaps the most serious environmental issue facing us." (Bill Nye). Climate change is neither a new issue nor is it a fully settled one. Developed countries are dealing with it successfully while undeveloped countries are still struggling. Unfortunately, Pakistan is one of them. The main reasons of climate change are Green house gases, Smoke from Industries, excess use of vehicles, Burning of fossil fuels, chlorofluorocarbons releasing from refrigerators and causing serious impacts on human life like diseases, skin, eye infections, unusual Raining, acid Rain melting of glaciers and flood. Unless these causes are addressed properly, the issue of climate change cannot be solved.
