INTRODUCTION.

As nation invest in educating their brightest mind, a different kind of War is being lost, the battle to retain

talent. The brain drain is siphoning off the very individuals who could drive innovation, economic growth, and societal progress. Brain drain refers to the emigration of highly skilled and educated individuals from their home country to seek better opportunities elsewhere. In today's interconnected world, the phenomenon of brain drain has become a pressing concern for worldwide. The main causes behind brain drain are lack of employment, political instability, unsatisfactory way of living, lack

of information and
desire for higher education
resulting in Shortage
of Skilled Professional,
lack of industrial growth and
innovation, loss of economic
development and loss of
Revenue. Unless these
causes are addressed
properly, these impact
on nations won't be
resolved.
