Q7

TRANSLATION

Ramanujan was a british indian mathematician his work is still used in space technology.

He faced objection in this admission because he only have interest in mathematics. A British professor

Mr Hardy took him to the Cambridge and where he was awarded the degree of B.A.

He discovered 2520 number.

which is divisiable with 0 to 9 numbers. This was Ramanujan's time.

Due to the lack of food supply in britain this genetics was recognized in 1920. India has made a feature film on this.
