4. Conclusion

4.1. Thesis restated.

The Essay

A Country's most Powerful asset are their Skilled ones and intellectual's, unfortunately Pakistan is slowly losing it's intellectual and Skilled force.

According to a report during the first three months of Jan 2025 almost five lakh people had leave the country. In the era of technology and AI where countries are offering fully funded Scholarship & huge salaries to work for them. Pakistan is losing men due to high rate of inflation, no job opportunities, no bright future & low standards of life which are affecting the country's economy, research and innovation, social lives of the people & loss of intellectual minds. Now is the time to address this issue seriously.
